SAMHSA FUNDING OPPORTUNITY ANNOUNCEMENT

Emergency Grants to Address Mental and Substance Use Disorders During COVID-19 (FG-20-006)

Funding Mechanism: Grant
Anticipated Total Available Funding: $110 million
Anticipated Number of Awards: 60
Anticipated Award Amount: Up to $2 million per State/Up to $500,000 per Territories and Tribes
Length of Project: 16 months
Cost Sharing/Match Required?: No

Application Due Date: Friday, April 10, 2020

The Substance Abuse and Mental Health Services Administration (SAMHSA) is accepting applications for fiscal year (FY) 2020 Emergency Grants to Address Mental and Substance Use Disorders During COVID-19 (Short Title: Emergency COVID-19). SAMHSA recognizes there are currently 57.8 million Americans living with mental and/or substance use disorders (National Survey on Drug Use and Health, 2018). The current national crisis of COVID-19 will certainly contribute to growth in these numbers. Americans across the country will struggle with increases in depression, anxiety, trauma, and grief. There is also anticipated increase in substance misuse as lives are impacted for individuals and families. The purpose of this program is to provide crisis intervention services, mental and substance use disorder treatment, crisis counseling, and other related supports for children and adults impacted by the COVID-19 pandemic. Funding will be provided for states, territories, and tribes to develop comprehensive systems to address these needs. The purpose of this program is specifically to address the needs of individuals with serious mental illness, individuals with substance use disorders, and/or individuals with co-occurring serious mental illness and substance use disorders.

Eligibility:
- State governments, the District of Columbia, Guam, the Commonwealth of Puerto Rico, the Northern Mariana Islands, the Virgin Islands, American Samoa, the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau.
- Federally recognized American Indian/Alaska Native (AI/AN) tribes, tribal organizations, Urban Indian Organizations, and consortia of tribes or tribal organizations.

Contact Information:
Program & Grants Management Issues: Beverly Vayhinger, Office of Financial Resources, Division of Grants Management, SAMHSA, (240) 276-0564, beverly.vayhinger@samhsa.hhs.gov.

NRI is Creating a 2020 State Mental Health Profile System – SMHA Information Sought

The NRI Board of Directors, primarily comprised of State Mental Health Agency (SMHA) Commissioners and their senior staff, has initiated a new State Profiles System (SPS) to provide SMHAs with up-to-date information about the financing and organization of state mental health systems. For over 20 years, NRI has been providing SMHAs information about the organization, funding, operation, services, policies, statutes, staffing, and clients of all SMHAs across the U.S. States, NASMHPD, and advocates use this information in budgeting, planning, and evaluating state mental health systems and in responding to requests from Governor’s, Legislators, media, and advocates. The 2020 SPS Components were sent to all SMHAs on January 14, 2020 and responses are due from states by March 20, 2020. NRI will begin producing topical reports utilizing the Profiles data soon after state responses are finalized.

The SPS components for 2020 were developed with guidance from an advisory group comprised of SMHA Commissioners, Planners, and program staff, as well as staff from NASMHPD and NRI. The 2020 SPS components build on prior years’ components, but have been tailored to address new issues facing the states, and edited to ensure that only relevant information is included. Based on major policy topics raised by SMHA Commissioners and their senior staff, the 2020 SPS includes expanded components addressing Forensic Mental Health Services (including a focus on competency assessment and restoration activities in hospital and community settings), and a new Residential Continuum of Care component addressing housing options and supports provided by the SMHA for individuals with mental illness.

The updated 2020 SPS is a self-funded effort by the SMHAs that recognize the value in having access to an up-to-date, comprehensive database of comparable information about all SMHAs that states can use for budgeting, planning, and policymaking at the local, state, and national levels. Having access to this information will provide critical information to SMHA leadership and will reduce the burden on SMHAs of compiling information for decision makers, planners, researchers, and others through the availability of a centralized, standard compilation of information about the financing of SMHAs. To date, over half of the states have committed to helping fund this initiative.

Every state that completes the 2020 SPS Components will receive general reports showing state and national trends. However, states that financially support this initiative will also receive more expansive, customized state reports with additional details and trends. For more information about supporting this important initiative, please contact NRI’s Executive Director/CEO, Tim Knettler at tknettler@nri-inc.org or 703-738-8160.
Coronavirus Anxiety Causing Increases in Call Volume at Some Call Centers, But Not At the National Suicide Prevention Lifeline

Mental health hotlines and helplines across the nation have reported receiving calls related to concerns about the coronavirus, but a report that call volume at the National Suicide Prevention Lifeline has increased significantly is not correct.

The Daily Mail reported March 31 that Didi Hirsch’s Crisis and Disaster Distress Helpline, located in Los Angeles, received 1,519 calls specifically related to the novel coronavirus in March—a 75-fold increase from the previous month. Lynn Morris, Senior VP of Clinical Operations of Didi Hirsch Mental Health Services, told the Daily Mail that 500 of those calls occurred last week. However, Morris told the Daily Mail that the crisis line hasn’t seen an overall uptick in the total number of calls, just an increase in the callers citing COVID-19 concerns. The crisis line averages approximately 11,000 calls per month.

Top concerns include feelings of anxiety and stress, fear of social isolation, unemployment, inability to pay bills, fear of eviction, and health concerns for family and loved ones contracting the virus. Didi Hirsch’s data showed that of the over 1,500 callers who spoke about COVID-19, 43 percent reported having anxiety and stress, 25 percent cited health care concerns, 21 percent said they were having relationship issues, and 19 percent called about loneliness and social isolation.

One in five of the callers concerned about the coronavirus expressed suicidal ideation. The preliminary data indicated that 37 percent of the COVID-19 callers were over the age of 45 and 66 percent were female.

Morris anticipates that her center will see skyrocketing call volume related to COVID-19 in the next few weeks, with anxiety over the virus increasing as the number of confirmed cases and fatalities rise in the United States, as reported in the Daily Mail and on Twitter at @DidiHirsh.

On the other U.S. coast, an official at a Boston-based helpline operated by Samaritans reported to Talking Points Memo (TPM) in a March 25 article that the helpline has seen a rise in the number of calls, going from an average of 150 to 175 per day to now an average of 250. Kathy Marchi, Executive Director of Samaritans, commented to TPM that hold times have become an issue and they are working hard to meet the call volume demand. Ms. Marchi noted that many callers are expressing anxiety about going to the grocery store, paying bills, family stressors, and being socially isolated, but are not acutely suicidal.

Frances Gonzalez, Senior Marketing & Communications Director at the National Suicide Prevention Lifeline’s Disaster Distress Helpline, told TPM that local crisis lines will have different call volume experiences based on their local conditions. This appears to be consistent with what two crisis call centers in Kentucky are experiencing. Geneva Robinson, Clinical Supervisor, at the Louisville-based call center, Seven County Services, estimated that call volume has increased about 20 percent, as reported on March 23 in the Louisville Courier Journal. In contrast, CEO Joe Dan Beavers of LifeSkills in Bowling Green, Kentucky told the Courier Journal that their call volume has remained the same, but that call durations have increased in the last week.

Ms. Gonzalez reported to Yahoo News on March 27, “The National Suicide Prevention Lifeline has not experienced significant changes in call volume at this time.”

While most local mental health hotlines and helplines have seen only modest increases in call volume, the call centers are preparing for an uptick in the forthcoming weeks as the coronavirus pandemic continues impacting communities across the U.S.

In times of public health and economic uncertainty, mental health concerns arise. To support mental health initiatives related to COVID-19, Congressional passage of the Coronavirus Aid, Relief and Economic Security (CARES) Act provided $425 million to SAMHSA, including $50 million for suicide prevention programs.

The National Suicide Prevention Lifeline has developed coping strategies to help people feeling emotional distress surrounding the coronavirus crisis.

- Set a limit on media consumption, including social media, local or national news.
- Stay active. Make sure to get enough sleep and rest. Stay hydrated and avoid excessive amounts of caffeine or alcohol. Eat healthy foods when possible.
- Connect with loved ones and others who may be experiencing stress about the outbreak. Talk about your feelings and enjoy conversation unrelated to the outbreak.
- Get accurate health information from reputable sources. For health information about COVID-19, please contact the Centers for Disease Control at cdc.gov, your local healthcare provider, or your local 211 and 311 services, if available.
- The national Disaster Distress Helpline is available to anyone experiencing emotional distress related to COVID-19. Call 1-800-985-5990 or text TalkWithUs to 66746 to speak to a caring counselor.
- If you’re experiencing emotional distress related to COVID-19, please call the National Suicide Prevention Lifeline or your local crisis line.
- For coping tools and resources, visit the Lifeline website at suicidepreventionlifeline.org or Vibrant Emotional Health’s Safe Space at vibrant.org/safespace.

How #CrisisTalk is Transforming Dialogue in Behavioral Health

The National Association of State Mental Health Program Directors (NASMHPD) and its Crisis Now partners—the National Suicide Prevention Lifeline and VIBRANT Emotional Health, the National Action Alliance for Suicide Prevention, the National Council for Behavioral Health, and R.I. International—have launched the #CrisisTalk website, sparking much-needed dialogue on behavioral health crises. The new publication provides a platform for diverse experts and people with Lived Experience to exchange thoughts, knowledge, and innovations. Each article shares a person’s perspective, whether that’s an emergency department doctor who tells her story, revealing the challenges emergency physicians experience when faced with a patient in crisis, or a student with suicidal ideation and his university choosing legal self-protection over doing what was best for him.

The objective is to facilitate conversations about mental health crises, including missed opportunities, gaps, tools, and best practices. #CrisisTalk is sharing the diverse stories of people affected by behavioral health crises, including those who have experienced one, loved ones, and stakeholders who need to be part of the conversation, swinging the pendulum worldwide toward awareness and change.

#CrisisTalk interviews reflect the perspectives of mental health experts and first responders. They point out common misconceptions and challenges in their fields and the communities they serve. This includes why some locations do not develop a full continuum of crisis care services. The discussions transcend geography and illustrate ways to make positive changes in the crisis space. Simply having a conversation with a person in crisis, a non-judgmental, empathic approach, along with a willingness to listen and sit with someone, can go a long way.

#CrisisTalk is part of CrisisNow.com, a roadmap to safe, effective crisis care that diverts people in distress from the emergency department and jail by developing a continuum of crisis care services that match clinical needs to care. To learn more, visit www.CrisisNow.com/talk.

---

**THIS WEEK: COVID-19: Tsunami Alarms Are Blaring—We Must Shore Up the Sea Wall**

For behavioral health crisis responders, we must anticipate the possibility that this national emergency might have waves that aren’t counted in weeks but months. What is the impact and how do we innovate to meet the evolving needs of our communities as our resources are strained, some to the point of exhaustion?

Disaster Mental Health Crisis Response: Over the past 20 years, we’ve seen multiple national disasters with 9/11 and Hurricane Katrina, both requiring robust disaster mental health crisis response to support individuals recovering from the psychological effects of natural and human-caused disasters. FEMA’s Crisis Counseling Assistance and Training Program (CCP) has provided supplemental assistance to local community efforts. SAMHSA’s Disaster Distress Helpline and the National Suicide Prevention Lifeline have also engaged in partnerships with state-level behavioral health and public health efforts. FEMA is now working with DHHS to execute a “whole of government response.”

**Crisis Now Partners:**

The National Association of State Mental Health Program Directors (NASMHPD), founded in 1959 and based in Alexandria, VA, represents the $41 billion public mental health service delivery system serving 7.5 million people annually in all 50 states, 4 territories, and the District of Columbia. NASMHPD (pronounced “NASH-bid”) is the only national association to represent state mental health commissioners/directors and their agencies, and serves as the lead for www.CrisisNow.com.

The National Suicide Prevention Lifeline and VIBRANT Emotional Health provides free and confidential emotional support and crisis counselling to people in suicidal crisis or emotional distress 24 hours a day, 7 days a week, across the United States. Funded by the U.S. Substance Abuse and Mental Health Services Administration (SAMHSA) and administered by Vibrant Emotional Health, the Lifeline engages in innovative public messaging, development of best practices in mental health, creative partnerships, and more to improve crisis services and advance suicide prevention for all. www.suicidepreventionlifeline.org | www.vibrant.org | www.twitter.com/800273TALK

The National Action Alliance for Suicide Prevention is the public-private partnership working with more than 250 national partners advancing the National Strategy for Suicide Prevention with the vision of a nation free from the tragic experience of suicide and a goal of reducing the annual suicide rate 20 percent by 2025. Administered by EDC, Inc., the Action Alliance was the catalyst for the Zero Suicide Healthcare and Crisis w: Transforming Services innovations. www.theactionalliance.org | www.edc.org | www.twitter.com/Action_Alliance

The National Council for Behavioral Health is the unifying voice of America’s health care organizations that deliver mental health and addictions treatment and services. Together with their 3,000 member organizations serving over 10 million adults, children and families living with mental illnesses and addictions, the National Council is committed to all Americans having access to comprehensive, high-quality care that affords every opportunity for recovery. The National Council introduced Mental Health First Aid USA and have trained more than 1.5 million Americans. www.thenationalcouncil.org | www.mentalfighthfirstaid.org | www.twitter.com/NationalCouncil

RI International (d/b/a for Recovery Innovations, Inc.) is a global organization that offers more than 50 programs throughout the United States and abroad, characterized by recovery and a focus on what’s strong, not what’s wrong. More than 50% of employees report a lived experience with mental health, and the “Fusion Model” crisis stabilization programs are featured in Crisis Now. The Company also provides training and consulting internationally and supports Zero Suicide International, a partnership with Behavioral Health Link. www.riinternational.com | www.zerosuicide.org | www.twitter.com/RI_Internationa

**Webinar Announcement:**

**The Critical Role of Mentors in Veterans Treatment Courts**

*Tuesday, April 21, Noon to 1:30 p.m. E.T.*

Veterans Treatment Courts (VTCs) use an interdisciplinary team approach to divert justice involved veterans away from incarceration and into treatment. This proactive approach towards justice involvement is accomplished by effectively targeting and addressing participants’ responsivity needs, specifically ones that are clinical (medical, behavioral health and trauma), cultural, and criminogenic. In this webinar, participants will learn about the core, essential components that comprise a VTC with particular focus placed on the mentoring component.

Three presenters will discuss essential elements that contribute to the ongoing success of the mentoring component and the importance of using best practices in peer mentoring implementation. Vital information about resources for mentoring components to access will be discussed, including recently developed online training modules, and a new mentor coordinator curriculum.

**Understanding the New SAMHSA/OCR Guidance for Telehealth SUD and MH Services**

*Monday April 6, 11 a.m. to Noon E.T.*

The CoE-PHI is hosting a national webinar to review new OCR and SAMHSA COVID-19 Guidance about federal patient privacy regulations while providing SUD and MH telehealth services.

**Webinar Objectives:**

- Describe how the privacy laws apply to telehealth
- Describe OCR and SAMHSA Guidance related to privacy issued in response to the need to rapidly expand telehealth services due to the COVID-19 pandemic
- Facilitate provider sharing to explore practical ideas and innovative approaches to protect patient privacy while providing SUD/Mental Health telehealth services

**Who Should Attend?** SUD and MH treatment providers, administrators, state agency leaders, and others involved in transitioning to providing care to patients/clients remotely

**SAVE THE DATES – 2020 NASMHPD ANNUAL CONFERENCE (COMMISSIONERS ONLY)**

**NASMHPD**

July 26 to 28 at the Westin Arlington Gateway Hotel, Arlington, Virginia

Additional Information to be Provided in the Near Future
Department of Justice Bureau of Justice Assistance

Funding Mechanism: Grant
Anticipated Total Available Funding: $4 million
Anticipated Number of Awards: 4
Anticipated Award Amount: Up to $1M per year
Length of Project: 48 Months
Cost Sharing/Match Required?: No

Application Due Date: Monday, May 4, 2020, 11:59 E.T.

This program will help jurisdictions assess their reentry system, identify strengths and gaps, and then build capacity for either improving reentry systems generally or improving service delivery by implementing or expanding a reentry program.

Grantees will work with BJA to either identify system gaps and then implement improvements to enhance the effectiveness of their reentry system or to implement or enhance a reentry program to reduce recidivism among a specific target population.

Eligibility:
Eligible applicants include units or components of state, county, or local government and federally recognized Indian tribal governments.

Department of Justice Office of Juvenile Justice and Delinquency Prevention

OJJDP FY 2020 Strategies To Support Children Exposed to Violence (CFDA 16.818)

Funding Mechanism: Grant
Anticipated Total Available Funding: $7 million
Anticipated Number of Awards: 7
Anticipated Award Amount: Up to $1M per year
Length of Project: 36 Months
Cost Sharing/Match Required?: No

Application Due Date: Monday, April 27, 2020, 11:59 E.T.

The U.S. Department of Justice (DOJ), Office of Justice Programs (OJP), Office of Juvenile Justice and Delinquency Prevention (OJJDP) is seeking applications for funding for the fiscal year (FY) 2020 Strategies To Support Children Exposed to Violence. This program furthers the Department's mission by combating victimization and reducing violent crime.

Funding under this program can be used to develop support services for children exposed to violence in their homes, schools, and communities; and to develop, enhance, and implement violent crime reduction strategies that focus on violent juvenile offenders. This program development and resource allocation decision by interested applicants should be based on currently available resources to the jurisdiction and gaps in services. The goals of the program are to: 1) reduce the incidence of violence through accountability efforts for juvenile offenders; 2) respond to victimization of children whether as a result of violence that occurs in the school, community or family; and 3) increase protective factors to prevent juvenile violence, delinquency, and victimization.

Eligibility:
- states and territories,
- units of local government,
- federally recognized Indian tribal governments,
- nonprofit organizations (including tribal nonprofit organizations), and
- institutions of higher education (including tribal institutions of higher education).

A solicitation webinar will be held on March 26, 2020 at 2 p.m. ET. This webinar will provide a detailed overview of the solicitation and allow an opportunity for interested applicants to ask questions. Preregistration is required for all participants. Register by clicking this link and following the instructions. Due to the limited time, OJJDP encourages participants to review the solicitation and submit any questions they may have in advance and no later than 3 days prior. Submit your questions to grants@ncjrs.gov with the subject as “Questions for OJJDP FY 2020 Strategies to Support Children Exposed to Violence Webinar.” After the webinar, you will find the webinar recording uploaded here.

On February 26, SAMHSA released its National Guidelines for Mental Health Crisis Care: A Best Practices Toolkit. These guidelines are intended to assist states and communities with the development and implementation of effective crisis services and systems. The webinar, Improving Access to Care using *The National Guidelines for Crisis Care – A Best Practice Toolkit*, will showcase these national guidelines in crisis care within a toolkit that supports program design, development, implementation and continuous quality improvement efforts. It is intended to help mental health authorities, agency administrators, service providers, state and local leaders think through and develop the structure of crisis systems.

**Presenters:**
- Elinore McCance-Katz, M.D., Ph.D., Assistant Secretary for Mental Health and Substance Use
- David W. Covington, LPC, MBA, RI International CEO & President and Behavioral Health Link Partner
- Paul Galdys, MBA, RI International Deputy CEO
- Judy Fitzgerald, Commissioner of the Georgia Department of Behavioral Health and Developmental Disabilities (DBHDD)
- Debbie Atkins, LPC, Director of Crisis Coordination, Georgia Department of Behavioral Health and Developmental Disabilities (DBHDD)
- Marie Williams, LCSW, Commissioner of the Tennessee Department of Mental Health and Substance Abuse Services (TDMHSAS)

**Register HERE**

Closed Captioning is Available for this Webinar

*We do not offer CEU credits however letters of attendance are offered upon request.*

*If you have any questions, please contact Kelle Masten via email or at 703-682-5187.*

Agency for Healthcare Research and Quality (AHRQ) Funding Opportunity Announcement

Notice of Intent: Revision Supplements to Existing AHRQ Grants and Cooperative Agreements to Address Health System Responsiveness to COVID-19 (NOT-HS-20-007)

AHRQ intends to publish a new funding notice allowing requests for urgent revision supplements to existing AHRQ grants and cooperative agreements to address health system responsiveness to COVID-19. AHRQ intends to allow grantees with active AHRQ research grants to submit requests for competitive revision supplements to address timely health system and healthcare professional response to COVID-19. Grant activity codes to be included or excluded from the funding notice will specified in the announcement.

It is expected that competitive revision supplement requests will capitalize on the expertise of grant personnel and the institutional environment to expand the specific aims of the on-going research to develop high-impact new knowledge concerning COVID-19. Competitive revision supplements will be limited in duration (perhaps 12 months). The amount of supplemental funds that may be requested will be limited, and will be specified in the funding notice. AHRQ expects to make at least $2.5M available to fund meritorious revision supplements in FY2020. AHRQ plans to release the supplement announcement in April 2020 with an opening date in mid-May.

NASMHPD Partners with Westat, Council of State Administrators of Vocational Rehabilitation (CSVAR) on Facilitating Competitive, Integrated Employment for Individuals with Mental Illness

NASMHPD, Westat, and the Council of State Administrators of Vocational Rehabilitation (CSAVR) have announced a partnership to provide practical information and specific tools to State mental health (MH) and vocational rehabilitation (VR) programs to enhance collaborations at the local and state levels in order to increase competitive, integrated employment outcomes for individuals with mental illness.

The partnership extends the existing collaboration established for the Social Security Administration’s Supported Employment Demonstration (SED).

Over the next three years, NASMHPD and CSAVR, working closely with the Westat IPS Center, and their respective members, will identify and disseminate strategies for and examples of successful collaborations between State MH and VR agencies partnering with businesses to meet business hiring needs in ways that produce competitive, integrated employment opportunities for individuals with mental illness.

NASMHPD and CSAVR plan to distribute to their members proven strategies and practices through a variety of methods: conference presentations, articles in our newsletters, webinars, the sharing of success stories, joint one-on-one calls with our members, issue briefs, and access to technical assistance. Some pertinent issue briefs are already available from NASMHPD, the IPS Employment Center, and members of the IPS Learning Community.
We strongly encourage you to register online at our website for the fastest and most efficient process.

NASMHPD continues to receive recognition from the behavioral health community at large, including from our friends at SAMHSA, for our 2017 and 2018 Beyond Beds series of papers highlighting the importance of providing a continuum of care beyond institutional inpatient care.

A 2019 multiple-paper follow-up to the Beyond Beds series is now up on the NASMHPD website. The 2019 papers take the Beyond Beds theme to look at additional innovative approaches offered in the community and factors impacting those services, covering such topics as early antipsychotic prescribing practices in nursing homes, developing a behavioral health workforce, a public health approach to trauma and addiction, addressing behavioral health in traumatic brain injury treatment, recovery-oriented cognitive therapy, integration of mental health and substance use services for those with co-occurring conditions, schools as part of the continuum of care for children and adolescents, and addressing social and mental health needs in transition-age homeless youth.

One of those papers, Lessons from the International Community to Improve Mental Health Outcomes, authored by Deborah Pinals, M.D., chair of the NASMHPD Medical Directors Division and Medical Director, Behavioral Health and Forensic Programs in the Michigan Department of Health and Human Services, pivots from NASMHPD’s previous work in this series to look beyond the borders of the United States to other countries for examples of successful and promising strategies across nine areas of focus. The paper’s highlighted examples from the international community aim to further illuminate strategies and inspire ongoing crucial dialogue in an effort to improve mental health in the United States.

Following are links to the other reports in the 2019 Technical Assistance Coalition series.

Effects of CMS’ Measure of Antipsychotic Prescribing Practices for Nursing Facilities on Utilization of Antipsychotic Medications and Changes in Diagnostic Patterns

Developing a Behavioral Health Workforce Equipped to Serve Individuals with Co-Occurring Mental Health and Substance Use Disorders

Schools as a Vital Component of the Child and Adolescent Mental Health System

Addressing Intersecting Social and Mental Health Needs among Transition-Aged Homeless Youth

The NASMHPD Technical Assistance Coalition series will continue in 2020.
Student Mental Health: Responding to the Crisis

Mary Ward House Conference & Exhibition Centre, London
Tuesday, October 6, 2020

This conference will break-down the cultures, economic factors, social and institutional pressures contributing to dramatic rises in disclosures of mental health issues at universities and student suicides.

Delegates will explore why more students are turning to unconventional incomes like gambling and sex work during their studies, how the university experience can compound cultural and environmental conditions that lead students to access and supply drugs; and discussing how cross-institutional co-operation as well as legislative review of attitudes towards information sharing could prevent students reaching a point of crisis.

With just over two months to go to this expected sell out event places are now at a premium. However you can still...

Student Mental Health: Responding to the Crisis is our third national conference bringing together domestic and European HE institutes, students, academic/policy researchers, health, social care and counselling services to develop pragmatic approaches to:

- Transitions of otherwise non-criminal student populations into drug use and supply created by financial instability, distance from guardians and the interconnected nature of student life.
- Preventing student suicides; developing best practices in data sharing between institutions and families – measuring the importance of student safety and public interest against data protection, as well as investing in welfare support services and advanced planning.
- Isolation and instability created by increases in students engaging with sex work and gambling as a means of meeting the cost of university life.
- Cultures of anxiety driven by transitions in curriculum and lifestyle, persecutory perfectionism, unrealistic expectations projected on new media platforms, institutional pressures and uncertainty around post-university employment opportunities.
- Normalization of competitive and insecure working cultures in the HE sector – how does this impact the human value of academic labor and the support available to young people struggling with their studies.

2020 Attendee Breakdown by Sector.

Curious about who else will be in attendance on the day?
Due to the rapidly evolving COVID-19 pandemic, we are all in the midst of a very challenging time, and we know that our state and local members, and many of our partners are on the front line. We want to thank you for all you are doing in your state and communities—please know that you have our unwavering support.

Like everyone else, APHSA continues to closely track COVID-19 developments and guidance from public health officials in order to make every effort to safeguard the health and well-being of our staff, members, and partners. While we continue to plan for our 2020 National Health and Human Services Summit currently scheduled for June 7-10 in Arlington, VA, as well as other APHSA events scheduled to take place later in the summer and fall, we are simultaneously making contingency plans should we not be able to convene. In the same spirit, we will remain flexible in regards to event deadlines as we move forward.

We are mindful of the influx of messages you are likely receiving during this unpredictable time that requires so many of us to keep in touch. We therefore plan to share weekly, touch-base updates pertaining to COVID-19, our events, and more through our newsletter, This Week In Washington, which is published on Fridays. If you do not currently receive This Week In Washington you can subscribe here. We will also provide updates on our events page and twitter account, and continue to provide any urgent messages directly to your inbox.

If you have any questions or concerns, events-related or other, please feel free to contact Jessica Garon, Director of Communications.

**2020 Health Summit: Addressing Mental Health Disparities**

*Monday April 20, 2020 8:30 a.m. - 4:00 p.m. E.T.*

Experienced a mental health issue. Those from marginalized communities have compounded effects, as mental health illnesses are not uniformly treated. The goal of the 2020 Health Summit will be to address key areas of disparity in mental health treatment.

Join the Health and Human Rights Institute of the National Center for Civil and Human Rights for our 2020 Health Summit as we explore various topics related to mental health disparities. The program will feature rotating panels discussing the 6 2020 Summit focus areas of: 1) states’ lagging mental health parity laws; 2) the toll of white supremacy on mental health; 3) trauma informed care relating to gender-based and intersectionality-based violence; 4) the mental health of youth in marginalized communities; 5) mental health and HIV; 6) homelessness and mental health.

The Summit will include time to network with leaders and experts in the field. The doors will open at 8:30 a.m. with a continental breakfast and the program will begin promptly at 9:00 a.m. and close at 4:00 p.m., inclusive of lunch.

**Who Should Attend?**

- Social workers, mental health professionals, researchers; nurse practitioners
- Community leaders; healthcare professionals
- Policymakers, academics, and human rights leaders, and the general public

The event is free, but registration is required.

For more information, visit 2020healthsummit.org or email mwatson@civilandhumanrights.org.

Mental Health Considerations During the COVID-19 Outbreak

In January 2020 the World Health Organization (WHO) declared the outbreak of a new coronavirus disease in Hubei Province, China to be a Public Health Emergency of International Concern. WHO stated there is a high risk of the 2019 coronavirus disease (COVID-19) spreading to other countries around the world.

WHO and public health authorities around the world are taking action to contain the COVID-19 outbreak. However, this time of crisis is generating stress in the population. These mental health considerations were developed by the Mental Health Department as support for mental and psychological well-being during COVID-19 outbreak.

For the General Population

1. COVID-19 has and is likely to affect people from many countries, in many geographical locations. Don’t attach it to any ethnicity or nationality. Be empathetic to those who got affected, in and from any country, those with the disease have not done anything wrong.

2. Don’t - refer to people with the disease as “COVID-19 cases”, “victims” “COVID-19 families” or the “diseased”. They are “people who have COVID-19”, “people who are being treated for COVID-19”, “people who are recovering from COVID-19” and after recovering from COVID-19 their life will go on with their jobs, families and loved ones.

3. Avoid watching, reading or listening to news that cause you to feel anxious or distressed; seek information mainly to take practical steps to prepare your plans and protect yourself and loved ones. Seek information updates at specific times during the day once or twice. The sudden and near-constant stream of news reports about an outbreak can cause anyone to feel worried. Get the facts. Gather information at regular intervals, from WHO website and local health authorities platforms, in order to help you distinguish facts from rumors.

4. Protect yourself and be supportive to others. Assisting others in their time of need can benefit the person receiving support as well as the helper.

5. Find opportunities to amplify the voices, positive stories and positive images of local people who have experienced the new coronavirus (COVID-19) and have recovered or who have supported a loved one through recovery and are willing to share their experience.

6. Honor caretakers and healthcare workers supporting people affected with COVID-19 in your community. Acknowledge the role they play to save lives and keep your loved ones safe.

For Health Care Workers

7. For health workers, feeling stressed is an experience that you and many of your health worker colleagues are likely going through; in fact, it is quite normal to be feeling this way in the current situation. Stress and the feelings associated with it are by no means a reflection that you cannot do your job or that you are weak. Managing your stress and psychosocial wellbeing during this time is as important as managing your physical health.

8. Take care of your basic needs and employ helpful coping strategies- ensure rest and respite during work or between shifts, eat sufficient and healthy food, engage in physical activity, and stay in contact with family and friends. Avoid using unhelpful coping strategies such as tobacco, alcohol or other drugs. In the long term, these can worsen your mental and physical well-being. This is a unique and unprecedented scenario for many workers, particularly if they have not been involved in similar responses. Even so, using the strategies that you have used in the past to manage times of stress can benefit you now. The strategies to benefit feelings of stress are the same, even if the scenario is different.

9. Some workers may unfortunately experience avoidance by their family or community due to stigma or fear. This can make an already challenging situation far more difficult. If possible, staying connected with your loved ones including through digital methods is one way to maintain contact. Turn to your colleagues, your manager or other trusted persons for social support- your colleagues may be having similar experiences to you.

10. Use understandable ways to share messages with people with intellectual, cognitive and psychosocial disabilities. Forms of communication that do not rely solely on written information should be utilized If you are a team leader or manager in a health facility.

11. Keeping all staff protected from chronic stress and poor mental health during this response means that they will have a better capacity to fulfill their roles.

12. Ensure good quality communication and accurate information updates are provided to all staff. Rotate workers from high-stress to lower-stress functions. Partner inexperienced workers with their more experienced colleagues. The buddy system helps to provide support, monitor stress and reinforce safety procedures. Ensure that outreach personnel enter the community in pairs. Initiate, encourage and monitor work breaks. Implement flexible schedules for workers who are directly impacted or have a family member impacted by a stressful event.

13. If you are a team leader or manager in a health facility, facilitate access to, and ensure staff are aware of where they can access mental health

(Continued on page 15)
Mental Health Considerations During the COVID-19 Outbreak (cont’d)

(Continued from page 14) and psychosocial support services. Managers and team leads are also facing similar stressors as their staff, and potentially additional pressure in the level of responsibility of their role. It is important that the above provisions and strategies are in place for both workers and managers and that managers are able to role-model self-care strategies to mitigate stress.

14. Orient responders, including nurses, ambulance drivers, volunteers, case identifiers, teachers and community leaders and workers in quarantine sites, on how to provide basic emotional and practical support to affected people using psychological first aid.

For Caretakers of Children

15. Help children find positive ways to express disturbing feelings such as fear and sadness. Every child has his/her own way to express emotions. Sometimes engaging in a creative activity, such as playing, and drawing can facilitate this process. Children feel relieved if they can express and communicate their disturbing feelings in a safe and supportive environment.

16. Keep children close to their parents and family, if considered safe for the child, and avoid separating children and their caregivers as much as possible. If a child needs to be separated from his/her primary caregiver, ensure that appropriate alternative care is and that a social worker, or equivalent, will regularly follow up on the child. Further, ensure that during periods of separation, regular contact with parents and caregivers is maintained, such as twice-daily scheduled phone or video calls or other age-appropriate communication (e.g., social media depending on the age of the child).

17. Maintain familiar routines in daily life as much as possible, especially if children are confined to home. Provide engaging age appropriate activities for children. As much as possible, encourage children to continue to play and socialize with others, even if only within the family when advised to restrict social contact.

18. During times of stress and crisis, it is common for children to seek more attachment and be more demanding on parents. Discuss the COVID-19 with your children in honest and age-appropriate information. If your children have concerns, addressing those together may ease their anxiety. Children will observe adults’ behaviors and emotions for cues on how to manage their own emotions during difficult times.

For Caretakers of Older Adults

19. Older adults, especially in isolation and those with cognitive decline/dementia, may become more anxious, angry, stressed, agitated, and withdrawn during the outbreak/while in quarantine. Provide practical and emotional support through informal networks (families) and health professionals.

20. Share simple facts about what is going on and give clear information about how to reduce risk of infection in words older people with/without cognitive impairment can understand. Repeat the information whenever necessary. Instructions need to be communicated in a clear, concise, respectful and patient way, and it may also be helpful for information to be displayed in writing or pictures. Engage their family and other support networks in providing information and helping them practice prevention measures (e.g. handwashing etc.)

21. Encourage older adults with expertise, experiences and strengths to volunteer in community efforts to respond to the COVID-19 outbreak (for example the well/healthy retired older population can provide peer support, neighbor checking, and childcare for medical personnel restricted in hospitals fighting against COVID-19.)

For People in Isolation

22. Stay connected and maintain your social networks. Even in situations of isolations, try as much as possible to keep your personal daily routines. If health authorities have recommended limiting your physical social contact to contain the outbreak, you can stay connected via email, social media, video conference and telephone.

23. During times of stress, pay attention to your own needs and feelings. Engage in healthy activities that you enjoy and find relaxing. Exercise regularly, keep regular sleep routines and eat healthy food. Keep things in perspective. Public health agencies and experts in all countries are working on the outbreak to ensure the availability of the best care to those affected.

24. A near-constant stream of news reports about an outbreak can cause anyone to feel anxious or distressed. Seek information updates and practical guidance at specific times during the day from health professionals and WHO website and avoid listening to or following rumors that make you feel uncomfortable.

Centers for Disease Control (NCIPC) Forecast Funding Opportunity Announcement

Preventing Adverse Childhood Experiences through Essentials for Childhood (CDC-RFA-CE20-2006)

Funding Mechanism: Grant
Anticipated Number of Awards: 5
Length of Project: Up to 5 Years

Anticipated Total Available Funding: $6.3 million
Award Amount: $420,000 to $525,000
Cost Sharing/Match Required?: Yes

Estimated Post Date: May 1, 2020
Estimated Award Date: Aug 01, 2020

Estimated Application Due Date: Jun 30, 2020
Estimated Project Start Date: Sep 01, 2020

The purpose of this funding is to support recipients in measuring, tracking, and preventing adverse childhood experiences (ACEs) in their states. Adverse Childhood Experiences (ACEs) are preventable, potentially traumatic events that occur in childhood (0-17 years) such as experiencing violence, abuse, or neglect; witnessing violence in the home; and having a family member attempt or die by suicide. Also included are aspects of the child’s environment that can undermine their sense of safety, stability, and bonding such as growing up in a household with substance misuse, mental health problems, or instability due to parental separation or incarceration of a parent, sibling or other member of the household. Currently, ACEs are difficult to track over time because they do not always come to the attention of agencies that compile publicly available administrative data and because the best surveillance data currently available for ACEs, such as those collected through the Behavioral Risk Factor Surveillance System (BRFSS), are from retrospective surveys with adults. These challenges make it difficult to assess current prevalence, track change over time, target prevention strategies, and measure the success of prevention strategies. In addition, to date, efforts to implement data-driven, comprehensive, evidence-based prevention strategies have been lacking in communities across the U.S.

This NOFO will support the implementation of data-driven, comprehensive, evidence-based prevention strategies by building a surveillance infrastructure for the collection, analysis, and application of such ACEs data, so that states can monitor the prevalence of ACEs experiences among youth within their states and then use those data to inform prevention efforts at the state and community level. In tandem, this NOFO also provides resources to support states in implementing primary prevention strategies for preventing ACEs. Therefore, there are two overall required components of this award – a surveillance component and a prevention component. The work of these components, and the infrastructure and expertise exerted to accomplish that work, should be interdependent and should be planned and implemented as part of a dynamic system that reflects the 10 Essential Public Health Services promoted by CDC.

Eligibility: State Governments

Telehealth Learning and Discussion Series

FREE national online discussion and resource sharing opportunity for SUD treatment providers and recovery support providers.

The Addiction Technology Transfer Center (ATTC) Network, the Center for Excellence on Protected Health Information (CoE-PHI), and the Center for the Application of Substance Abuse Technologies (CASAT) at the University of Nevada - Reno (UNR) and the National Consortium of Telehealth Resource Centers are facilitating a FREE, national online discussion and resource sharing opportunity for substance use disorder (SUD) treatment providers and peer support specialists faced with transitioning their services to the use of telephone and videoconferencing methods in response to COVID-19 social distancing guidelines.

The series will feature:

- Live, one-hour sessions every week for at least 5 weeks via Zoom video conferencing (we may add more weeks based on demand!).
- Each session will include 45 minutes of peer-to-peer conversation and information exchange and "Top Five" tips and lessons learned.
- Access to experienced providers and others with expertise in providing services using videoconferencing (telehealth) and telephone for SUD treatment and recover support
- Access to professionals with expertise in protected health information and 42CFR Part 2
- Training tools, checklists and other relevant resources
- Training in the Application of Security and 42 CFR Part 2 presented during these sessions should not be construed as legal advice and participants are directed to discuss recommendations with their agency’s legal counsel. Finally, participants will be referred to SAMHSA resources that provide additional information regarding delivering services virtually.

Who Should Attend: SUD treatment providers, including peer specialists, counselors, administrators, peer support officers, and others providing and/or interested in providing care to patients/peers via videoconferencing platforms (telehealth) and/or telephone.

Registration: No registration required for the live sessions. Simply click on the Zoom link at the appropriate date and time to join the discussion. No CE's will be provided for these sessions.

Join one, two, three … or all of the live sessions! Combine your live session attendance with review of the online resource page (coming soon). Customize the experience to meet your needs. No prerequisites or required attendance.

Have Questions? Please contact Michael Graziano at mgraziano@caiglobal.org.

DISCLAIMER: Information exchanged and views expressed during these virtual sessions reflect the professionals’ conducting the session best understanding of the science or promising practices and should not be seen as directives. We encourage all participants to reflect on the context discussed during the learning series and to take that information to colleagues and/or supervisors for further discussion especially in the context of state rules or regulations. Professionals conducting these sessions will not make recommendations regarding specific video conferencing platforms or other technologies. In addition, content related to Privacy and Security and 42 CFR Part 2 presented during these sessions should not be construed as legal advice and participants are directed to discuss recommendations with their agency’s legal counsel. Finally, participants will be referred to SAMHSA resources that provide additional information regarding delivering services virtually.

Cost Sharing/Match Required?: No
Application Due Date: Tuesday, May 4, 2020

The Substance Abuse and Mental Health Services Administration (SAMHSA) is accepting applications for fiscal year (FY) 2020 Tribal Opioid Response grants (Short Title: TOR). The program aims to address the opioid crisis in tribal communities by increasing access to culturally appropriate and evidence-based treatment, including medication-assisted treatment (MAT) using one of the three FDA-approved medications for the treatment of opioid use disorder (OUD). In addition to focusing on OUD, recipients may also address stimulant misuse and use disorders, including cocaine and methamphetamine. The intent is to reduce unmet treatment need and opioid overdose-related deaths through the provision of prevention, treatment, and recovery support services for OUD and, if so desired, stimulant misuse and use disorders.

Eligibility: The applicant must be a federally recognized American Indian or Alaska Native tribe or tribal organization. Tribes and tribal organizations may apply individually, as a consortia, or in partnership with an urban Indian organization, as defined under 25 U.S.C. § 1603.

Contacts:

APPENDIX K

Annual Award Allocation of Tribal Opioid Response Grants Funds will be distributed noncompetitively based on values provided below. Dollar amounts are based on user population of tribes. If a tribe elects to partner with another tribe to apply, award amounts of each tribe in the application may be summed for total application budget. The first column shown represents the tribe's user population. The second column shows the maximum amount for which the tribe may apply per year. Applicants may elect to apply for less than the amount shown; however, applicants may not apply for more than the annual amount shown in either year of the grant.

ON-LINE COURSE - 330.610.89 - Knowledge for Managing County and Local Mental Health, Substance Use, and Developmental Disability Authorities

Location: Internet  Term: Summer Inst. Term  Department: Mental Health
Credits: 1 credits  Academic Year: 2020 – 2021
Dates: Tue 05/26/2020 - Wed 06/10/2020
Auditors Allowed: Yes, with instructor consent
Grading Restriction: Letter Grade or Pass/Fail
Course Instructor: Ronald Manderscheid
Contact: Ronald Manderscheid
Frequency Schedule: One Year Only
Resources:
- CoursePlus
- Evaluations

Description:
Reviews the key features of successful management of county and local authorities that oversee and conduct mental health, substance use, and developmental disability services. Also explores environmental factors that impact local operations, as well as facility with key tools to plan and implement services. Specifically explores two principal environmental factors, i.e., National Health Reform and Medicaid, and two primary tools for management, i.e., strategic planning and needs assessment. Emphasizes practical knowledge so that managers can apply the information immediately upon returning No consent required to their programs. Students are expected to bring practical problems to the course and to leave with useful strategies and tools for solving them.

Learning Objectives:
Upon successfully completing this course, students will be able to:
1. Assess the impact of National Health Reform and Medicaid on their own programs and will be able to employ useful strategic planning and needs assessment tools
2. Describe the essential features of National Health Reform and the Medicaid Program
3. Engage successfully in local strategic planning and needs assessment initiatives

Methods of Assessment:
This course is evaluated as follows:
- 35% Participation
- 65% Final Paper

Instructor Consent: No consent required.

Special Comments: Project is due June 30, 2020
Webinar Series: Recovery from Serious Mental Illness (SMI)

The Northeast and Caribbean MHTTC is proud to offer a webinar series on: **Recovery from Serious Mental Illness (SMI) and the Practices that Support Recovery.** This series will introduce the participant to recovery from SMI and many of the evidence-based and promising practices that support recovery.

**Upcoming events in the series (all events take place from 1:00 p.m. to 2:30 p.m. E.T.):**

- **April TBA** - *Supervision of Peer Providers: Effective Supervision of Peers by Non-Peer Supervisors*
- **April 23** - *Role of Health and Wellness in Recovery: Interventions to Reduce the High Rates of Morbidity and Mortality Among People with Serious Mental Illnesses*
- **May 7** - *Role of Religion and Spirituality in Recovery: Benefits and Challenges of Religion and Spirituality in Recovery and Strategies for Navigating this Topic*
- **May 21** - *Recovery in the Hispanic and Latinx Community: What is the Understanding of Recovery in the Hispanic and Latina Community and How Can We Support It*

**Compassion Fatigue and the Behavioral Health Workforce Curriculum Infusion Package** - This [5-part Curriculum Infusion Package (CIP)](https://mhttcnetwork.org/centers/global-mhttc/responding-covid-19) on Compassion Fatigue and the Behavioral Health Workforce was developed in 2020 by the Pacific Southwest Addiction Technology Transfer Center (PSATTC). Part 1 provides a brief overview of the behavioral health workforce and associated shortages, and introduces the demands on the workforce. Part 2 focuses on compassion fatigue and secondary traumatic stress. Part 3 provides a brief overview of how organizations can help individuals avoid experiencing burnout. Part 4 focuses on actions that behavioral health professionals can take to prevent compassion fatigue. And Part 5 focuses on self-care as an ethical duty in order to manage compassion fatigue.
Health Resources and Services Administration
Notice of Funding Opportunity
Opioid-Impacted Family Support Program - Opioid Workforce Expansion
Program- Paraprofessionals (HRSA-20-014)

Funding Mechanism: Grant
Anticipated Total Available Funding: $11.5 million
Anticipated Number of Awards: 19
Anticipated Award Amount: $600,000 per year
Length of Project: Up to 4 Years
Cost Sharing/Match Required?: No
Application Due Date: Tuesday, April 13, 2020
Projected Project Start Date: September 1, 2020

The purpose of this program is to support training programs that enhance and expand paraprofessionals knowledge, skills and expertise, and to increase the number of peer support specialists and other behavioral health-related paraprofessionals who work on integrated, interprofessional teams in providing services to children whose parents are impacted by opioid use disorders (OUD) and other substance use disorders (SUD), and their family members who are in guardianship roles. Additionally, a special focus is on demonstrating knowledge and understanding of the specific concerns for children, adolescents and transitional aged youth in high need and high demand areas who are at risk for mental health disorders and SUDs.

For the purpose of this NOFO, the term “paraprofessional” refers specifically to those working in the behavioral health-related field. Additionally, this program will provide developmental opportunities and educational support to increase the number of paraprofessional trainees receiving a certificate upon completion of pre-service training (Level I training which includes didactic and experiential field training) and entering into in-service training (Level II training which includes training at a registered Department of Labor apprenticeship site).

The program goal is to increase the number of peer support specialists and other behavioral health-related paraprofessionals who are prepared to work with families who are impacted by OUD and other SUDs in high need and high demand areas.

The program objectives are to:

1. Enhance and expand, didactic educational support and experiential field training opportunities for OIFSP paraprofessional trainees that target children, adolescents and transitional age youth whose parents are impacted by OUD and other SUDs, and their family members who are in guardianship roles.
2. Develop, or establish a partnership with, registered apprenticeship programs to provide in-service training that places paraprofessional trainees in behavioral health-related positions addressing OUD and other SUDs. The apprenticeship program constitutes Level II training.
3. Reduce financial barriers by providing financial support to trainees in the form of tuition/fees, supplies, and stipend support.
4. Create additional training positions beyond current program capacity to increase the number of paraprofessionals trained by a minimum of 10 percent in year one and maintain that level each year of the 4-year project period, with a focus on working with families who are impacted by OUD and other SUDs.

Eligibility:

- State-licensed mental health nonprofit and for-profit organizations. For the purpose of this NOFO, these organizations may include Academic institutions, including universities, community colleges and technical schools, which must be accredited by a nationally recognized accrediting agency, as specified by the U.S. Department of Education.
- Domestic faith-based and community-based organizations, tribes, and tribal organizations may apply for these funds, if otherwise eligible.

Individuals are not eligible to apply.

Program Contacts:

Business, Administrative, or Fiscal: William Weisenberg, Grants Management Specialist, Division of Grants Management Operations, OFAM, Health Resources and Services Administration (HRSA), 5600 Fishers Lane, Mailstop 10SWH03, Rockville, MD 20857, (301) 443-8056, wweisenberg@hrsa.gov.

A unique forum where all aspects of crisis services - Crisis Call Centers, Mobile Crisis Outreach Teams, and Crisis Residential Programs - will have a chance to meet, network, learn, and focus on our work.

WE"RE GOING VIRTUAL THIS YEAR!!!!

Rescheduled
NIMH Funding Opportunity Announcement

Implementing and Sustaining Evidence-Based Mental Health Practices in Low-Resource Settings to Achieve Equity in Outcomes (R34 Clinical Trial Required) – RFA-MH-20-401

Application Due Date: August 25, 2020, 5:00 p.m. Local Time of Applying Entity
Earliest Start Date: April 2021, respectively

This Funding Opportunity Announcement (FOA) supports pilot work for subsequent studies testing the effectiveness of strategies to deliver evidence-based mental health services, treatment interventions, and/or preventive interventions (EBPs) in low-resource mental health specialty and non-specialty settings within the United States. The FOA targets settings where EBPs are not currently delivered or delivered with fidelity, such that there are disparities in mental health and related functional outcomes (e.g., employment, educational attainment, stable housing, integration in the community, treatment of comorbid substance use disorders, etc.) for the population(s) served. Implementation strategies should identify and use innovative approaches to remediate barriers to provision, receipt, and/or benefit from EBPs and generate new information about factors integral to achieving equity in mental health outcomes for underserved populations. Research generating new information about factors causing/reducing disparities is strongly encouraged, including due consideration for the needs of individuals across the life span. Applications proposing definitive tests of an implementation strategy should respond to the companion R01 announcement RFA-MH-20-400.

This initiative supports pilot work in support of subsequent studies testing the effectiveness of strategies to deliver EBPs in low-resource settings in the United States, in order to reduce disparities in mental health and related functional outcomes (e.g., employment, educational attainment, stable housing, integration in the community, treatment of co-morbid substance use disorders, etc.) for the population(s) served. Of interest are settings where a significant number of children, youth, adults, or older adults with or at risk for mental illnesses can be found and evidence-based mental health treatments or services are not currently delivered. Applications focused on developmental work that would enhance the probability of success in subsequent larger scale projects are also encouraged.

Developmental work might include: refining details of the implementation approach; examining the feasibility of novel approaches and technologies; examining the feasibility of data collection including administration of instruments, obtaining administrative or other types of data, etc.; enhancing the protocol for the comparison group and randomization procedures (if appropriate); examining the feasibility of recruiting and retaining participants into the study condition(s); and developing and testing supportive materials such as training curricula. Therefore, collection of preliminary data regarding feasibility, acceptability and engagement of intervention targets is appropriate. However, given the intended pilot nature of the R34 activity code, conducting fully powered tests of outcomes or attempting to obtain an estimate of an effect size may not be feasible.

The goal of this FOA is to conduct pilot work in support of subsequent studies that develop test the effectiveness of scalable implementation strategies to achieve delivery of EBPs with high fidelity in low-resource settings and significantly improve clinical and functional outcomes toward greater equity with outcomes documented the general population studies.

Eligibility

Public/State Controlled Institutions of Higher Education Private Institutions of Higher Education

The following types of Higher Education Institutions are always encouraged to apply for NIH support as Public or Private Institutions of Higher Education:

- Hispanic-serving Institutions
- Historically Black Colleges and Universities (HBCUs)
- Tribally Controlled Colleges and Universities (TCCUs)
- Alaska Native and Native Hawaiian Serving Institutions
- Asian American Native American Pacific Islander Serving Institutions (AANAPISIs)

Nonprofits with and without 501(c)(3) IRS Status (Other than Institutions of Higher Education)

Small Businesses For-Profit Organizations Other Than Small Businesses

State Governments County Governments City or Township Governments Special District Governments

Indian/Native American Tribal Governments (Federally Recognized & Other than Federally Recognized)

U.S. Territories or Possessions Independent School Districts Public Housing Authorities Indian Housing Authorities

Native American Tribal Organizations (other than Federally recognized tribal governments)

Faith-Based or Community-Based Organizations Regional Organizations

NOT Eligible to Apply:

- Non-domestic (non-U.S.) Entities (Foreign Institutions).
- Non-domestic (non-U.S.) components of U.S. Organizations.
- Foreign components, as defined in the NIH Grants Policy Statement.
Leaders from countries around the world came together in Rotterdam, the Netherlands in September 2018 for Zero Suicide International 4. As a result, the 2018 International Declaration was produced with a video complement, The Zero Suicide Healthcare Call to Action.

During the fifth international summit, our goal is to identify the three next key steps through inspiration, ideation, and implementation.

Please note a key change for 2020: Prior ZSI events have been invitation only. Our first three events in 2014, 2015, and 2017 were all part of the International Initiative for Mental Health Leadership (IIMHL) events and followed their small match meeting format (with 40 to 70 participants only), with Rotterdam in 2018 being the first ZSI event to stand on its own (over 100 leaders joined). For Liverpool 2020, we will partner with Joe Rafferty and, together with the Zero Suicide Alliance hosting up to 500 or more in the Liverpool Football Club. For the first time, no invitation will be required and all interested in advancing safer healthcare are welcome to join.

In order to ensure the Liverpool summit maintains the strong focus on networking and action steps of our prior more intimate convenings, we are working with the Flourishing Leadership Institute and their amazing team experienced in whole-system transformation. We'll be harnessing the complete power of the group’s collective experience and imagination to drive forward the next successes in Zero Suicide Healthcare, and everyone who participates will be engaged.

Interested in becoming a sponsor? Contact karen.jones@riinternational at RI International or justine.maher@merseycare.nhs.uk at Mersey Care for details on available sponsorship packages. We’re excited the American Foundation for Suicide Prevention has again committed their support and look forward to connecting with many others who will help us make this event and its outcomes a success.

Nominate a Dr. Jan Mokkenstorm International Zero Suicide Visionary Award Winner

This year's International Zero Suicide Summit will be bittersweet as our first without our beloved colleague Jan Mokkenstorm. During the Summit in Liverpool, the first annual Jan Mokkenstorm Zero Suicide Visionary Award will be presented in his honor. Below is information on the award and instructions for nominating someone. We look forward to seeing everyone in Liverpool and remembering Jan’s contributions to making sure no one dies alone and in despair.

Dr. Jan Mokkenstorm played an integral part of the inaugural International Zero Suicide Summit with the International Initiative for Mental Health Leadership match in Oxford in 2014. In subsequent years, Dr. Mokkenstorm attended the International Zero Suicide Summits in Atlanta (2015), and Sydney (2017) in his continued commitment to the global Zero Suicide Movement. He provided vital participation in the collaborative development of the “International Declaration for Better Healthcare: Zero Suicide” in 2015. He also continued the push for the initiative to “move beyond the tipping point” by hosting the 4th international Zero Suicide Summit in Rotterdam in 2018.

Jan demonstrated his passionate commitment to reducing suicides through his tireless efforts to promote the belief that suicides should never be an event that occurs. Through visionary leadership he inspired countless others to join this cause themselves on an individual, organizational, and community level. He was instrumental in spreading the global adoption of the Zero Suicide mission as well as set the pace for innovation and substantial change in many countries across the globe. Simply put, Jan demonstrated exceptional service to the betterment of society through his work with Zero Suicide and suicide prevention.

Nomination Requirements

1. Must have shown national/international leadership in the area of suicide prevention
2. Must have participated in fostering substantial change and innovation in the area of suicide prevention
3. Must have challenged/helped shape government policies and supported a wider awareness and discussion around suicide prevention
4. Must be in attendance at the International Zero Suicide Summit when the award will be presented
5. Must have two (2) letters of recommendation from recognized suicide prevention leaders in one’s home country

Judging

1. The announcement of nominations will be handled by the host nation in conjunction with other communications about the Zero Suicide Summit
2. The host nation will convene a Nomination Committee of three individuals who will review the nominations and award one winner

If you have nominations or would like to participate, please contact Becky Stoll, Vice President, Crisis and Disaster Management at becky.stoll@centerstone.org.
NOW RECRUITING

CSC OnDemand: An Innovative Online Learning Platform for Implementing Coordinated Specialty Care

Combining the strongest components of OnTrack and the evidence-based Individual Resilience Training (IRT) of NAVIGATE, C4 Innovations is offering a new training in coordinated specialty care.

This is an ideal opportunity for teams to receive new or refresher training in CSC.
The tool will offer scalable, efficient professional development for CSC teams.

Now recruiting both new and already-established CSC teams interested in participating in a research study. Our goal is to test our new training tool with practitioners in the field. Your feedback will help us refine the tool, share what we learn, and improve services for people experiencing first episode psychosis.

What can teams EXPECT?

- Comprehensive, role-specific training for all team members, including peers
- Courses, consultation calls, and a community of practice led by experts in the field. See reverse for full list of expert trainers.
- Opportunity for refresher training for existing teams and teams with new members.
- All teams will be trained by mid-April
  - OnDemand training scheduled 3/30/2020 – 4/10/2020
- Opportunity to provide critical feedback on a new CSC training tool

HOW CAN MY AGENCY TAKE PART?

Call our Research Coordinator, Effy: 347-762-9086
Or email: cscstudy@center4si.com
OUR CSC ONDEMAND TRAINERS

Iruma Bello, PhD | Clinical Training Director, OnTrackNY
Dr. Bello is an Assistant Professor of Clinical Psychology in Psychiatry. She is also the Clinical Training Director of OnTrackNY at the Center for Practice Innovations within the Division of Behavioral Health Services and Policy Research at Columbia University. She graduated with her PhD in Clinical Psychology from the University of Hawaii- Honolulu.

Abaigael Duke | Recovery Specialist and Trainer, OnTrackNY
A NYS certified peer specialist, Abaigael currently serves as a Recovery Specialist and Trainer for OnTrack NY. She has worked as a peer specialist in a variety of settings through the NYS Office of Mental Health, including clinics as well as a member of an ACT team. She was based in the OMH NYC field office as an Advocacy Specialist in the Children's Services division.

Susan Gingerich, MSW | Training Coordinator, NAVIGATE
Susan Gingerich has been closely involved with the NAVIGATE First Episode of Psychosis program since 2009, helping to develop all the manuals and providing consultation calls for the directors of 17 NAVIGATE programs during the research phase of The Recovery After An Initial Schizophrenia Episode (RAISE) initiative. She is currently the training coordinator for the NAVIGATE Program.

Thomas Jewell, PhD | Project Manager, Center for Practice Innovations (CPI) Division of Behavioral Health Services and Policy Research
Tom Jewell, PhD, is on the staff of the CPI, Columbia University, New York State Psychiatric Institute and the Department of Psychiatry at the University of Rochester, School of Medicine and Dentistry. His specialty has been in evaluation and research into evidence-based practices. He is a family intervention trainer with OnTrackNY, which deals with first episode psychosis.

Nev Jones, PhD | Assistant Professor, University of South Florida | Department of Mental Health Law & Policy | Louis de la Parte Florida Mental Health Institute
Dr. Jones received her Ph.D. from DePaul University, followed by a postdoctoral fellowship at Stanford University in medical anthropology and psychiatry. Dr. Jones has worked in leadership positions in both state government and nonprofit community mental health. Her research covers social, cultural and structural determinants of disability and recovery, youth and young adult behavioral health services, and peer and family support.

Piper Meyer-Kalos, PhD, LP | Director of Research and Evaluation, Minnesota Center for Chemical and Mental Health
Piper Meyer-Kalos, PhD, HCP-P, holds her doctoral degree in Clinical Rehabilitation Psychology from Indiana University – Purdue University, Indianapolis and specializes in psychiatric rehabilitation and treatment for FEP with interests in recovery, positive psychology, and psychosocial treatment for people with severe mental illness. Since 2009, Dr. Meyer-Kalos has been part of the psychosocial development team of RAISE project and has co-led the individual therapy component (IRT).

Ilana Nossel, MD | Medical Director, OnTrackNY | Assistant Professor, Columbia University Medical Center
Dr. Nossel practices general adult psychiatry, including consultation, psychotherapy and medication management. She currently serves as the Medical Director for OnTrack NY. She previously worked as Associate Director of the PI Residents Clinic and completed a pilot study adapting Critical Time intervention (CTI) for frequent users of the psychiatric emergency room.

Gary Scanion, Jr., M.P.S., CPRP | IPS Trainer Center for Practice Innovations (CPI) Division of Behavioral Health Services and Policy Research, New York State Psychiatric Institute
Gary has worked in the mental health sector of healthcare for 29 years. He is currently an IPS Trainer at the CPI at Columbia University Psychiatry, where his primary mission is training Supported Education and Employment Specialists (SEES) in both OnTrackNY and OnTrackUSA.

Delbert Robinson, MD | Associate Professor, The Center for Psychiatric Neuroscience, Feinstein Institutes for Medical Research
Dr. Robinson has led NIMH-funded studies focused upon first episode schizophrenia, tools to enhance antipsychotic medication adherence, and obsessive-compulsive disorder. For the RAISE-ETP study, he chaired the Psychopharmacological Treatment Committee. He was the primary developer of the Medications manual for RAISE-ETP and has provided training and consultation for NAVIGATE prescribers since 2009.
The National Center of Excellence for Eating Disorders (NCEED) was created to serve as the centralized hub dedicated to eating disorders education and training for both healthcare providers and the general public. NCEED is partnering with the 3C Institute to develop and launch an interactive, web-based, educational, training platform to ensure that high-quality trainings are provided to health professionals across multiple disciplines.

Visit NCEED’s Website at https://www.nceedus.org/

NCEED is the nation’s first center of excellence dedicated to eating disorders. It was founded in 2018 by the Substance Abuse and Mental Health Services Administration (SAMHSA), with the mission to advance education and training of healthcare providers and to promote public awareness of eating disorders and eating disorder treatment. Based at the University of North Carolina at Chapel Hill, NCEED includes clinicians, researchers, and advocates who specialize in eating disorders care and are committed to providing up-to-date, reliable, and evidence-based information.

The goal of NCEED is to ensure that all individuals with eating disorders are identified, treated, and supported in recovery. Though eating disorders are serious conditions, they can be identified and treated effectively—particularly when providers and the public have the knowledge and skills necessary to make a difference.

Information, Training, and Technical Assistance

The NCEED website (https://www.nceedus.org/) is designed to be user-friendly and easy to navigate for all users. The center’s web platform is divided into four content areas based on the user’s role. These content areas tailor the user’s experience in searching for up-to-date, evidence-based trainings and resources.

Get information on mental health services and resources near you, searchable by state or zip code: www.samhsa.gov/find-help

Behavioral Health Treatment Services Locator
National Center on Advancing Person-Centered Practices and Systems

NCAPPS assists states, tribes, and territories to transform their long-term care service and support systems to implement U.S. Department of Health and Human Services policy on person-centered thinking, planning, and practices. It supports a range of person-centered thinking, planning, and practices, regardless of funding source. Activities include providing technical assistance to states, tribes, and territories; establishing communities of practice to promote best practices; hosting educational webinars; and creating a national clearinghouse of resources to support person-centered practice. Visit the new NCAPPS website for more information.

Each month, NCAPPS will host monthly informational webinars on a range of topics that relate to person-centered thinking, planning, and practice. NCAPPS webinars are open to the public, and are geared toward human services administrators, providers, and people who use long-term services and supports. Webinars will be recorded and archived on the NCAPPS website. All webinars will include a panelist who represents the perspective of service users, including our Person-Centered Advisory and Leadership Group members, self-advocates, or other stakeholders with lived experience with the topic.

The MHDD-NTC is a collaboration between the University Centers for Excellence in Developmental Disabilities at the University of Kentucky, University of Alaska Anchorage, and Utah State University.

Established in 2018 through funding provided by the Administration for Community Living, the training center aims to improve mental health services and supports for people with developmental disabilities. By serving not only as a training center, but also as a national clearinghouse, the training center helps provide access to the most current evidence-based, trauma-informed, culturally responsive practices that address the mental health needs of individuals with developmental disabilities.

**Physician Continuing Medical Education (CME) Credit**
The American Psychiatric Association (APA) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. The APA designates this enduring activity for a maximum of 12.0 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

**Nursing Continuing Professional Development (NCPD, formerly CNE) Credit**
The American Psychiatric Nurses Association is accredited with distinction as a provider of nursing continuing professional development by the American Nurses Credentialing Center's Commission on Accreditation.
Ketamine/Esketamine in the Treatment of Serious and Persistent Depression: Practical Considerations

Thursday, April 6, 3:00 p.m. to 4:00 p.m. E.T.

This webinar will briefly review the science and pharmacology that led to the development of ketamine and Esketamine as a treatment for neuropsychiatric disorders. It will specifically focus on major issues to be contemplated when considering recommending treatment with ketamine or Esketamine to treat severe and persistent major depressive disorder. We will critically review the existing data from a wide range of clinical trials and attempt to incorporate this data into clinical decision making processes.

Presenter: Gerard Sanacora, PhD, MD, Yale University

The 2020 Patient Advocacy Summit part of the 8th Annual Patient Congress April 6-7 in Philadelphia is just one month away. The conference's topic is "Foster an Integrated Approach to Patient Advocacy through Patient Engagement, Public Policy Education, and Stakeholder Collaboration." This Summit will bring together pharmaceutical manufacturers, patient groups, patient leaders, and policy makers, to discuss ways to tackle the complexities of patient advocacy and the health care market.

Key Themes to be Addressed:
- Patient Advocacy Strategies
- Policy Initiatives and Legislation
- Value Metrics and Measurable Outcomes
- Patient Education and Support Initiatives
- Compliance and Transparency in Advocacy Partnerships
- Social Media and Patient Engagement

**Office Hour: Behavioral Health Equity and CLC Sustainability Strategies**

Sustaining culturally and linguistically responsive services within health organizations and systems is critical in advancing behavioral health equity. This discussion will provide examples of behavioral health strategies and activities to sustain CLC within communities based on the National Culturally and Linguistically Appropriate Services (CLAS) Standards in Health and Health Care.

Effective strategies for expanding and sustaining behavioral health equity include: 1) Implementing Policies, Administrative, and Regulatory Changes; 2) Creating and Improving Financing Strategies; 3) Providing Training, Technical Assistance and Coaching; and 4) Developing or Expanding Services based on the System of Care philosophy and approach. (Stroul and Friedman, 2011).

*This is an open office hour call. Please be prepared to share your ideas, questions and collaborations in an open forum. The use of web camera is encouraged. The lines will remain open.*

**Innovative Strategies for Outreaching and Engaging Young People in Behavioral Health Services**

Outreach and engagement are critical components to establishing better outcomes for youth and young adults of transition age. During this webinar, the Young Adult Services and Supports Learning Community (YASS) will explore best practices and lessons experienced by the Florida Healthy Transitions team. This SAMHSA funded program has outreached to over 11,762 community members, conducted 17,313 facilitated behavioral health screenings, and provided services to over 1,600 youth and young adults. We will review their peer-to-peer model of care along with strategies on how they integrate youth into the full scope of the program.

**Addressing Racism as a Social Determinant of Health and Well-Being in Children, Adolescents, and Emerging Adults**

During this webinar, there will be an in-depth discussion and presentation for professionals working in behavioral health and health care settings, including family and youth engagement professionals.

- Defining racism as a social determinant of health and the importance of addressing racism in advancing health equity;
- Sharing childhood experiences of racism and their impact on the health and well-being of children, adolescents, emerging adults, and their families; and
- Identifying strategies to mitigate the effects of racism on children and adolescents through clinical practice, workforce development, policies, community-level interventions, and systems transformation.

**2020 Training Institutes, July 1 to 3, 2020**

For more than 30 years, the Training Institutes, a biennial event, have been the premier convening of leaders in Children’s Services. The 2020 Training Institutes, What Could Be: Bolder Systems and Brighter Futures for Children, Youth, Young Adults, and their Families, challenge us to build on existing delivery systems for Children’s Services with new ideas to meet the future.

- The 2020 National Conference on Juvenile Justice has been postponed.
- The 33rd Annual Children’s Mental Health Research & Policy Conference has been cancelled.
- The **2020 Janet Reno Forum** is postponed.
- The July Youth in Custody Certificate Program is postponed.
SAMHSA’s Early Serious Mental Illness Treatment Locator is a confidential and anonymous source of information for persons and their family members who are seeking treatment facilities in the United States or U.S. Territories for a recent onset of serious mental illnesses such as psychosis, schizophrenia, bi-polar disorder, or other conditions. These evidence-based programs provide medication therapy, family and peer support, assistance with education and employment and other services.

Individuals who experience a first onset of serious mental illness - which can include a first episode of psychosis - may experience symptoms that include problems in perception (such as seeing, hearing, smelling, tasting or feeling something that is not real), thinking (such as believing in something that is not real even when presented with facts), mood, and social functioning. There are effective treatments available and the earlier that an individual receives treatment, the greater likelihood that these treatments can lead to better outcomes and enable people to live full and productive lives with their family and friends.

SAMHSA has integrated data on first episode psychosis programs that was provided by NASMHPD and the NASMHPD Research Institute (NRI) into its existing treatment locator. Users receive information on Coordinated Specialty Care and other first episode psychosis programs operating in their state. This tool is designed to help quickly connect individuals with effective care in order to reduce the risk of disability.

You Can Access the SMI Treatment Locator HERE

Social Marketing Assistance Available

Social marketing resources for system of care communities were developed by the SAMHSA-funded Caring for Every Child’s Mental Health Campaign team, which was a collaboration between NASMHPD, Vanguard Communications (link is external), Youth MOVE National (link is external), and the Federation of Families for Children’s Mental Health (link is external). The Campaign was funded through Fiscal Year 2018. Below are a sampling of commonly-requested social marketing resources developed by the Campaign.

System of Care Cooperative Agreements that are currently funded by SAMHSA should seek social marketing technical assistance through the University of Maryland’s TA Network.

Other organizations or entities seeking social marketing technical assistance, including State Behavioral Health Agencies, are welcome to contact NASMHPD. Additional social marketing instructional materials, training, and consultation may be available. If you’d like to discuss your needs and/or have questions about how we can help, please contact Leah Holmes-Bonilla. If you would like to submit a request for social marketing technical assistance or training from NASMHPD, please fill out this application form.
