House of Representatives’ HEROES Act Contains Significant Funding for Treatment of Serious Mental Illness and Substance Use Disorders, and Additional Funding for the Suicide Lifeline

The HEROES Act legislation, H.R. 1600, introduced by House of Representative Democrats on May 12 contains significant funding for treatment of mental health and substance use disorders.

The Act, scheduled to be voted on the House floor on May 15, includes $3 billion to increase mental health support during the COVID-19 pandemic, to support substance abuse treatment, and to offer increased outreach, in the form of:

- $1 billion for the Community Mental Health Services Block Grant, 142 percent of the current funding level already appropriated for Fiscal Year 2020;
- $1.5 billion for the Substance Abuse Prevention and Treatment Block Grant, just 16 percent less than the current funding level already appropriated for Fiscal Year 2020;
- $100 million for services to homeless individuals (PATH), 154 percent of the current funding level already appropriated for Fiscal Year 2020;
- $100 million for Project AWARE to identify students and connect them with mental health services, just $2 million less than the current funding level already appropriated for Fiscal Year 2020;
- $10 million for the National Child Traumatic Stress Network in addition to the $68.87 million already appropriated for Fiscal Year 2020;
- $265 million for emergency response grants to address immediate behavioral health needs as a result of COVID-19, in addition to the $110 million already appropriated for that purpose in the CARES Act enacted March 27, and distributed to states and territories last month;
- $25 million for the Suicide Lifeline and Disaster Distress Helpline in addition to the $19 million appropriated for the Suicide Lifeline for Fiscal Year 2020; and
- not less $150 million for tribes, tribal organizations, urban Indian health organizations, or health service providers to tribes across a variety of programs.

The legislation, drafted without input from the Senate or White House, and so unlikely to be enacted in its current form, also Establishes a technical assistance center at the Substance Abuse and Mental Health Services Administration (SAMHSA) that will support public or nonprofit entities and public health professionals seeking to establish or expand access to mental health and substance use services associated with the COVID-19 public health to support research on the mental health consequences of COVID-19, including the impact on health care providers.

With regard to the Suicide Lifeline, the legislation designates the three-digit 9-8-8 as the universal dialing code for the Lifeline, requires the FCC to evaluate and submit a report to Congress on the feasibility and cost of automatically providing the dispatchable location of calls to 9-8-8, and would allow states to impose a fee or charge on voice service subscribers’ bills for the support or implementation of 9-8-8 services.

With regard to Medicaid, the legislation would increase the Federal matching payments to states, already increased by 6 percent under the CARES Act, by a total of 14 percentage points from July 1, 2020 through June 30, 2021. It would also increase Federal payments to state Medicaid programs for home and community-based services (HCBS) by 10 percentage points from July 1, 2020 through June 30, 2021, and match Federal payments to Indian tribes at 100 percent through June 30, 2021. Medicaid Disproportionate Share Hospital (DSH) payments would be increased by 2.5 percent. Incarcerated individuals would become eligible for Medicaid coverage 30 days prior to their release, while citizens of the freely associated states the Federated States of Micronesia, The Republic of the Marshall Islands and the Republic of Palau) lawfully residing in the United States would have their Medicaid eligibility, stripped in 1996, restored.

The bill would also provide, inter alia,

- $100 billion in grants for hospital and health care providers to be reimbursed health care related expenses or lost revenue directly attributable to the public health emergency resulting from coronavirus;
- $7.6 billion to expand the capacity to provide testing, triage, and care for COVID-19 and other health care services at the approximately 1,000 community health centers across the country; and
- a $1,200 refundable tax credit for each family member ($2,400 for joint filers), paid out in advance payments, similar to the Economic Impact Payments in the CARES Act plus $1,200 per dependent up to a maximum of 3 dependents. The credit would phase out starting at $75,000 of modified adjusted gross income ($112,500 for head of household filers and $150,000 for joint filers) at a rate of $5 per $100 of income.

The rapid rise in the U.S. unemployment rate and associated economic insecurity associated with the COVID-19 pandemic will likely lead to elevated suicide rates, according to research estimations published online May 11 in *World Psychiatry*.

Previous research indicates that suicide rates increase during times of economic downturns. A one percent increase in the U.S. unemployment rate was associated with a rise in suicide rate of 0.99 percent. In Europe, a one-percent rise in unemployment led to a 0.79 percent increase in suicides among individuals age 65 and younger.

Dr. Roger McIntyre, professor of psychiatry at the University of Toronto, and graduate student researcher Yena Lee used time-trend regression models to assess and forecast suicides mortality rates following the projected unemployment rates of the economic downturn in response to the COVID-19 pandemic. McIntyre and Lee developed three case scenarios: 1) no significant change in unemployment rate (i.e., 3.6% for 2020, 3.7% for 2021); 2) moderate increase in projected unemployment rate (i.e., 5.8% for 2020, 9.3% for 2021), emulating unemployment rates in 2008 to 2009 from the Great Recession; and 3) extreme increase in projected unemployment rate (i.e., 24% for 2020, 18% for 2021).

They found that with the first model—relatively stable unemployment rate—projected suicide rates would be 15.7 per 100,000 (N=51,657 suicides) in 2020 and 16.2 per 100,000 (N=53,480 suicides) in 2021. For the second scenario—a moderate increase similar to that in the “Great Recession”—the projection was 16.9 per 100,000 (N=52,728) in 2020 and 17.5 per 100,000 (N=55,644) in 2021. McIntyre and Lee found that this model represented a 3 percent increase in annual suicide rates, or 3,235 additional suicides when compared to the latest 2018 figures of 48,432. The third model—extreme increase in unemployment rate—had suicide rates of 17.0 per 100,000 (N=56,052) in 2020 and 17.4 per 100,000 (N=57,249) in 2021. This rise would result in an 8.4 percent increase in suicide mortality, with 8,164 additional suicides above the 2018 suicide rate.

The authors comment, “What is especially concerning about our projections is the genuine uncertainty with respect to the labour market post-COVID-19, as well as the tremendous financial uncertainty and decrease in consumer sentiment, all of which are independent and additional contributors to suicide.”

In addition to the economic hardship, quarantine and social distancing policies have been mandated to mitigate the spread of COVID-19. McIntyre and Lee note that social disconnection is a significant risk factor for suicidal behavior.

Preventing suicides related to the COVID-19 pandemic is an important public health priority that can be achieved through providing financial supports to unemployed workers; investing in workforce programs focused on retaining workers; and ensuring timely access to mental health services, such as psychiatric emergency services to mitigate an individual’s imminent risk of suicide.
How #CrisisTalk is Transforming Dialogue in Behavioral Health

The National Association of State Mental Health Program Directors (NASMHPD) and its Crisis Now partners—the National Suicide Prevention Lifeline and Vibrant Emotional Health, the National Action Alliance for Suicide Prevention, the National Council for Behavioral Health, and R.I. International—have launched the #CrisisTalk website, sparking much-needed dialogue on behavioral health crises. The new publication provides a platform for diverse experts and people with Lived Experience to exchange thoughts, knowledge, and innovations. Each article shares a personal perspective, whether that’s an emergency department doctor who tells her story, revealing the challenges emergency physicians experience when faced with a patient in crisis, or a student with suicidal ideation and his university choosing legal self-protection over doing what was best for him.

The objective is to facilitate conversations about mental health crises, including missed opportunities, gaps, tools, and best practices. #CrisisTalk is sharing the diverse stories of people affected by behavioral health crises, including those who have experienced one, loved ones, and stakeholders who need to be part of the conversation, swinging the pendulum worldwide toward awareness and change.

#CrisisTalk interviews reflect the perspectives of mental health experts and first responders. They point out common misconceptions and challenges in their fields and the communities they serve. This includes why some locations do not develop a full continuum of crisis care services. The discussions transcend geography and illustrate ways to make positive changes in the crisis space. Simply having a conversation with a person in crisis, a non-judgmental, empathic approach, along with a willingness to listen and sit with someone, can go a long way.

#CrisisTalk is part of CrisisNow.com, a roadmap to safe, effective crisis care that diverts people in distress from the emergency department and jail by developing a continuum of crisis care services that match clinical needs to care. To learn more, visit www.CrisisNow.com/talk.

THIS WEEK: NEW HAMPSHIRE NAMI’S KEN NORTON ON PSYCHIATRIC BOARDING AND NEW HAMPSHIRE’S CRISIS SERVICES REDESIGN

In 2011, the United States Department of Justice (DOJ) wrote a letter to the New Hampshire Department of Justice, expressing concern with the high rates of hospitalization and rehospitalization, and the dearth of full continuum community based services in the state, citing violations of the Americans with Disabilities Act (ADA) Olmstead provisions. Shortly after that, at the beginning of 2012, legal advocates filed a federal class action suit against New Hampshire for the violations, and the federal DOJ joined the lawsuit (Amanda D., et al. v. Hassan, et al.; United States v. New Hampshire).

By 2013, psychiatric boarding in hospital emergency department beds and spaces had become a crisis. Ken Norton, LICSW, executive director of NAMI New Hampshire, says the dire situation arose from the absence of funding for solutions identified in the 2008 10 year plan as well as a reduction in adult state hospital beds. Norton met with new governor Maggie Hassan on her first day in office. With support from Governor Hassan, in December of 2013, the DOJ and private plaintiffs entered into a settlement agreement with New Hampshire that expanded crisis services. It included:

- The development of three mobile crisis teams in the Interstate 93 corridor, the population center for the state: Manchester, Concord, and Nashua,
- The development of assertive community treatment (ACT) teams to integrate psychiatric and medical treatment at each of the 10 community mental health centers,
- Increase in supported housing, and
- an increase in supported employment.

Crisis Now Partners:

The National Association of State Mental Health Program Directors (NASMHPD), founded in 1959 and based in Alexandria, VA, represents the $41 billion public mental health service delivery system serving 7.5 million people annually in all 50 states, 4 territories, and the District of Columbia. NASMHPD (pronounced “NASH-bid”) is the only national association to represent state mental health commissioners/directors and their agencies, and serves as the lead for www.CrisisNow.com.

The National Suicide Prevention Lifeline and Vibrant Emotional Health provides free and confidential emotional support and crisis counselling to people in suicidal crisis or emotional distress 24 hours a day, 7 days a week, across the United States. Funded by the U.S. Substance Abuse and Mental Health Services Administration (SAMHSA) and administered by Vibrant Emotional Health, the Lifeline engages in innovative public messaging, development of best practices in mental health, creative partnerships, and more to improve crisis services and advance suicide prevention for all. www.suicidepreventionlifeline.org www.vibrant.org www.twitter.com/800273TALK

The National Action Alliance for Suicide Prevention is the public-private partnership working with more than 250 national partners advancing the National Strategy for Suicide Prevention with the vision of a nation free from the tragic experience of suicide and a goal of reducing the annual suicide rate 20 percent by 2025. Administered by EDC, Inc., the Action Alliance was the catalyst for the Zero Suicide Healthcare and Crisis w: Transforming Services innovations. www.theactionalliance.org www.edc.org www.twitter.com/Action_Alliance

The National Council for Behavioral Health is the unifying voice of America’s health care organizations that deliver mental health and addictions treatment and services. Together with their 3,000 member organizations serving over 10 million adults, children and families living with mental illnesses and addictions, the National Council is committed to all Americans having access to comprehensive, high-quality care that affords every opportunity for recovery. The National Council introduced Mental Health First Aid USA and have trained more than 1.5 million Americans. www.thenationalcouncil.org www.mentalhealthfirstaid.org www.twitter.com/NationalCouncil

RI International (d/b/a for Recovery Innovations, Inc.) is a global organization that offers more than 50 programs throughout the United States and abroad, characterized by recovery and a focus on what’s strong, not what’s wrong. More than 50% of employees report a lived experience with mental health, and the “Fusion Model” crisis stabilization programs are featured in Crisis Now. The Company also provides training and consulting internationally and supports Zero Suicide International, a partnership with Behavioral Health Link. www.riinternational.com www.zerosuicide.org www.twitter.com/RI_International
Advancing States Creates ConnectToCareJobs.com to Enable States to Help Healthcare Facilities to Find Scarce Staff During and After the COVID-19 Pandemic

ADvancing States, the association representing the nation’s 56 state and territorial agencies on aging and disabilities and long-term services and supports directors, in collaboration with managed care enterprise Centene Corporation, has created a new website, www.ConnectToCareJobs.com, for use by all 56 states and territories as a tool for solving the critical problem many healthcare facilities face during the COVID-19 crisis – how to fill critical staffing gaps in a timely fashion.

The first release of www.ConnectToCareJobs.com allows nursing homes, assisted living facilities, residential care facilities, and long-term acute care hospitals to identify gaps in specific staffing needs they have on particular days. Healthcare professionals who are licensed and/or trained for the various roles needed by these facilities can register their availability and willingness to fill shifts. An algorithm will match the workers to the facilities in real time. States and territories have the ability to manage which facilities are included (to enable preference for those in crisis) as well as to monitor the matching process. In future iterations, the tool will include matching for hospitals, homecare agencies, hospice, and individuals who self-direct their care, and will eventually be extended to behavioral health employees and employers.

“The COVID-19 pandemic shines a light on the severity of our long-term services and supports workforce shortage across the nation,” shared Martha Roherty, Executive Director of ADvancing States. “State leadership have reported that their nursing homes, assisted living facilities, and other group homes are facing massive staffing shortages in some of the hardest hit areas. Our intention in building this website is to help fill those staffing gaps quickly.”

The framework and algorithm that powers www.ConnectToCareJobs.com has been donated by Centene to ADvancing States; States and territories will be able to add functionality to the framework, built on an open source platform, to help manage through the crisis.

“We are committed to the health of our country and are proud to have been able to quickly develop this asset with ADvancing States. Making sure that all of our nation’s providers are fully equipped to deal with this crisis is of paramount importance,” says Michael Monson, Senior Vice President, Medicaid and Complex Care for Centene.
Improving Access to Care: Critical Time Intervention to Help Transition People with Mental Illness out of Homelessness and Incarceration

**Wednesday, June 3, 2:00 p.m. to 3:30 p.m. E.T.**

Presented by the National Alliance on Mental Illness

Critical Time Intervention (CTI) is an intensive case management model delivered in a crisis setting during a critical transition. CTI was originally developed for people with serious mental illness who experience homelessness, with the goal of securing successful transitions to being housed. The crisis service model has also been used to promote successful transitions from hospitals and other institutions such as jails and prisons to community living. It focuses on community integration and continuity of care by ensuring that a person has enduring ties to their community and support systems during these critical periods to avoid the likelihood of a repeating crisis. In research trials of CTI, there was a significant decrease in recurrent homelessness up to nine months after the intervention ended.

In this webinar, Bebe Smith, MSW, LCSW, Director of Mental Health at Southern Regional Area Health Education Center, will discuss the building blocks of CTI, and describe several wide scale implementation projects, in North Carolina, New Hampshire and Canada.

**Presenter:** Bebe Smith led a pilot of Critical Time Intervention (CTI) from 2012 to 2015. CTI was adopted for statewide expansion in 2014. She is a trainer in Family Psychoeducation and Critical Time Intervention.

Improving Access to Care by Partnering with and Minimizing Law Enforcement in Mental Health Crisis

**Wednesday, June 10, 2:00 p.m. to 3:30 p.m. E.T.**

Presented by the National Alliance on Mental Illness

People with mental illness—just like people with any medical condition—need a range of treatment, services and supports, depending on an individual's unique needs. Unfortunately, our current mental health system was never built to meet the needs of the nearly 45 million Americans who have a mental illness. Without an effective mental health system, communities have relied on the criminal justice system to provide mental health care and as a result, every year over 2 million people with mental illness are booked into America’s jails and prisons.

Law enforcement, in partnership with mental health professionals and advocates, have worked for decades to divert people with mental illness from the criminal justice system. While many of these efforts have improved access to care and improved responses to people experiencing a mental health crisis, many front-line personnel continue to ask: “divert to what?”

In this webinar, two models of crisis care will be examined that promote community-based support with a focus on minimizing law enforcement in crisis through proper partnership including the Rapid Integrated Group Healthcare Team (RIGHT) and the Retreat Model of Crisis Urgent Care. The RIGHT Care program includes specially trained and equipped police officers, paramedics, and mental health professionals who respond as a team to safely and effectively manage patients who are experiencing behavioral health emergencies. The Retreat Model of Crisis Urgent Care emphasizes a physical layout that is an open retreat and staff with lived experience who provide 24/7 outpatient lobby with immediate care, 23-hour temporary observation recliners, sub-acute crisis stabilization with 2- to 4-day average length of stay.

**Presenters**

- Shannon Scully, Senior Manager for Criminal Justice Policy at NAMI
- Paul Galdys, Deputy CEO for RI International
- Kevin Oden, Director, Office of Homeless Solutions (Dallas)

SAMHSA-SPONSORED WEBINARS

Improving Access to Care by Using Creative Support to Address Families Waiting for Services
Wednesday, May 27, 2:00 p.m. to 3:30 p.m. E.T.
Developed under contract by the National Association of State Mental Health Program Directors (NASMHPD) and presented by the National Federation of Families for Children’s Mental Health

Families across the country have been struggling with long waitlists to access care for their children. The wait for services can vary from 2 to 13 weeks or more depending on the community that a family resides in and their state policy. The waiting period between identifying needed services and accessing the identified services can be a challenging period for families because the need for services cannot be put on hold until services are available. Families begin to look for alternative support in multiple avenues including the internet and social media. Increased access of the internet and social media has increased the accessibility to the state and local family-run organizations. As the state and local family-run organizations become more visible, families are reaching out to these organizations for help during this critical waiting period. This puts the family-run organizations in the nucleus of supporting families in crises. While families wait for identified formal services and supports such as clinical therapeutic supports, in home behavioral services, respite care, family peer support and the availability of psychiatric residential beds, state and local family organizations need to create plans that can support families effectively.

The webinar will bring together the Executive Director of the National Federation of Families for Children’s Mental Health and the Executive Directors of two state family-run organizations, NC Families United and Parent/Professional Advocacy League to share their perspectives at the national and state level. The presenters will share ideas and tools utilized in various states across the nation to help alleviate parental stress while waiting for formalized services. The webinar will focus on creative measures and tools state and local family support organizations and agencies can apply. Examples of various tools used in North Carolina and Massachusetts will be highlighted. The PowerPoint webinar will include lecture, interactive problem solving, questions and skills building.

Objectives:
1- Participants will be able to identify various tools to help support families, such as the creation of a culturally appropriate tip sheet, development of a local community resource list and the development of a short video identifying natural supports.
2- Participants will understand how a family-run organization can help a family or youth develop a safety plan.
3- Participants will have a knowledge of alternative uses for the internet, social media and “creative app” family support and live chat.

Presenters:
- Gail M. Cormier, CRC, BS., Executive Director, NC Families United
- Lisa Lambert, BS., Executive Director, Parent/Professional Advocacy League

Moderator: Lynda Gargan, Ph.D., Executive Director, NC Families United for Children’s Mental Health

Ways that Peers and Supervisors use Principles of Recovery to Improve Engagement of Adults in Crisis
Thursday May 28, 2:00 p.m. to 3:30 p.m. E.T.
Developed under contract by the National Association of State Mental Health Program Directors (NASMHPD) and presented by the National Coalition for Mental Health Recovery (NCMHR)

In this webinar we are proposing to describe the experience of peer workers and peer supervisors providing crisis services. We will cover the range of crisis services that peers are participating in from warm lines to crisis teams.

We will then explore ways that peers are uniquely suited to engaging persons in acute distress because their lived experience enables them to empathize at a deep level and to reduce the stigma which typical clinical services often represent. The workers will share how they use their peer experience to promote recovery. They will also describe how they work with their supervisors to balance the values of recovery with the expectations of the clinical team.

Mutuality for instance is a value of peer support, whereas in crisis situations the team often needs to take charge of the consumer’s decisions. Peers also find it important to focus on their self-care as crisis work at times triggers past traumas. Unique recruitment and training needs for peers planning to work in crisis services.

Participants of the webinar will learn:
- Objective 1: The range of crisis services employing peers
- Objective 2: Ways that peers are uniquely suited to engaging persons in acute distress in services
- Objective 3: Ways that supervisors help peers balance their peer role with the clinical expectations of the system
- Objective 4: Ways that peers and supervisors facilitate self-care and supports enabling peers to build resilience and avoid burnout
- Objective 5: Unique recruitment and training needs for peers working in crisis services

Panelists:
- Rosie Corliss is a Program Coordinator for Recovery Institute of Southwest Michigan, overseeing operational function of classes, groups, and activities for the community.
- Sean Harris has been the Executive Director of Recovery Institute, a peer run organization, since 2010.
- David Measel is the Executive Director of the Pennsylvania Peer Support Coalition and is a Pennsylvania Certified Peer Specialist (CPS), CPS Supervisor, and National Certified Peer Specialist.
- Jamie Burkes is a person with lived experience of recovery from MH and SUD issues.

Moderator: Daniel Fisher, Ph.D., M.D., President, National Coalition for Mental Health Recovery and Professor at Univ. of Massachusetts Dept. of Psychiatry

If you have any questions please contact Kelle Masten via email or at 703-682-5187.
Disasters have the potential to cause emotional distress. Some are more at risk than others:
- Survivors living or working in the impacted areas (youth & adults)
- Loved ones of victims
- First Responders, Rescue & Recovery Workers.

Stress, anxiety, and depression are common reactions after a disaster.

Warning signs of distress may include:
- Sleeping too much or too little
- Stomachaches or headaches
- Anger, feeling edgy or lashing out at others
- Overwhelming sadness
- Worrying a lot of the time; feeling guilty but not sure why
- Drinking alcohol, smoking or using tobacco more than usual;
- Using illegal drugs
- Feeling like you have to keep busy
- Lack of energy or always feeling tired
- Eating too much or too little
- Not connecting with others
- Feeling like you won’t ever be happy again
TIPS FOR COPING WITH STRESS AFTER A DISASTER:

**Take care of yourself.** Try to eat healthy, avoid using alcohol and drugs, and get some exercise when you can—even a walk around the block can make a difference.

**Reach out to friends and family.** Talk to someone you trust about how you are doing.

**Talk to your children.** They may feel scared, angry, sad, worried, and confused. Let them know it’s okay to talk about what’s on their mind. Limit their watching of TV news reports about the disaster. Help children and teens maintain normal routines to the extent possible. Role model healthy coping.

**Get enough ‘good’ sleep.** Some people have trouble falling asleep after a disaster, others keep waking up during the night.

If you have trouble sleeping:

- Only go to bed when you are ready to sleep
- Don’t watch TV or use your cell phone or laptop computer while you’re in bed
- Avoid eating (especially sugar) or drinking caffeine or alcohol at least one hour before going to bed
- If you wake up and can’t fall back to sleep, try writing in a journal or on a sheet of paper what’s on your mind.

**Take care of pets or get outside into nature when it’s safe.** Nature and animals can help us to feel better when we are down. See if you can volunteer at a local animal shelter—they may need help after a disaster. Once it’s safe to return to public parks or natural areas, find a quiet spot to sit in or go for a hike.

**Know when to ask for help.** Signs of stress can be normal, short-term reactions to any of life’s unexpected events— not only after surviving a disaster, but also after a death in the family, the loss of a job, or a breakup.

It’s important to pay attention to what’s going on with you or with someone you care about, because what may seem like “everyday stress” can actually be:

- Depression (including having thoughts of suicide)
- Anxiety
- Alcohol or Drug Abuse.

If you or someone you know may be depressed, suffering from overwhelming feelings of anxiety, or possibly abusing alcohol or drugs ...

**Call 1-800-985-5990 or text ‘TalkWithUs’ to 66746.**

**You Are Not Alone.**
The response to the COVID-19 pandemic involves massive disruptions to daily life in the United States. Large-scale illness and loss of life are producing widespread grief. Social distancing and stay at home orders may lead to social isolation and loneliness, on one hand, and rapidly reconfigured family roles and responsibilities on the other. Economic disruption generates anxiety and challenges in meeting basic needs. Public health and health care workers, as well as other essential workers, strive to assist their communities in navigating these challenges, as well as navigating the challenges themselves. What programs, policies, and laws are available to help those seeking to promote skills in self-care, stress management, coping, and resilience in their own workplaces and the broader community? Join us for an overview of the mental health implications of COVID-19 and the role of laws and policies in the initial stages of the mental health response.

After an initial presentation in the first hour, the presenters will address your questions and comments. We encourage you to submit your questions in advance when registering.

**REGISTER**

This webinar will provide you with:

- An overview of mental health impacts and needs of the COVID-19 pandemic
- A programmatic and policy framework for how Psychological First Aid can support public health and health care workers in maintaining their own health and well-being, as they support the general population
- A survey of legal and policy strategies to support mental health and well-being in the context of the COVID-19 pandemic

**Moderator:**

- Kayleen Klarich, Marketing and Membership Manager, Network for Public Health Law — National Office

**Presenters:**

- Jill Krueger, Director, Network for Public Health Law—Northern Region Office

You may qualify for CLE credit. ASLME is an approved provider of continuing legal education credits in several states ASLME will also apply for CLE credits in other states upon request.
The COVID-19 Telehealth Program will provide $200 million in funding, appropriated by Congress as part of the Coronavirus Aid, Relief, and Economic Security (CARES) Act to help health care providers provide connected care services to patients at their homes or mobile locations in response to the novel Coronavirus 2019 disease (COVID-19) pandemic. The COVID-19 Telehealth Program will provide immediate support to eligible health care providers responding to the COVID-19 pandemic by fully funding their telecommunications services, information services, and devices necessary to provide critical connected care services until the program’s funds have been expended or the COVID-19 pandemic has ended. In order to ensure as many applicants as possible receive available funding, we do not anticipate awarding more than $1 million to any single applicant.

Interested health care providers must complete several steps to apply for funding through the COVID-19 Telehealth Program:

1. Obtain an eligibility determination from the Universal Service Administrative Company (USAC); and
2. Obtain an FCC Registration Number (FRN); and
3. Register with System for Award Management

If an interested party does not already have these steps and accompanying components completed, the Bureau recommends that it gather the necessary information and begin to complete other necessary steps now, so it is prepared to submit applications for program funding as soon as applications can be accepted for filing. The Bureau will release a subsequent Public Notice announcing the application acceptance date immediately following the effective date of the COVID-19 Telehealth Program information collection requirements.

Eligibility Determination

Health care providers seeking to participate in the COVID-19 Telehealth Program must obtain an eligibility determination from the Universal Service Administrative Company (USAC) for each health care provider site that they include in their application. Health care provider sites that USAC has already deemed eligible to participate in the Commission’s existing Rural Health Care (RHC) Programs may rely on that eligibility determination for the COVID-19 Telehealth Program. Interested health care providers that do not already have an eligibility determination may obtain one by filing an FCC Form 460 (Eligibility and Registration Form) with USAC. Applicants that do not yet have an eligibility determination from USAC can still nonetheless file an application with the Commission for the COVID-19 Telehealth Program while their FCC Form 460 is pending with USAC.

Examples of services and devices that COVID-19 Telehealth Program applicants may seek funding for include:

- Telecommunications Services and Broadband Connectivity Services: Voice services, and Internet connectivity services for health care providers or their patients.
- Information Services: Remote patient monitoring platforms and services; patient-reported outcome platforms; store and forward services, such as asynchronous transfer of patient images and data for interpretation by a physician; platforms and services to provide synchronous video consultation.
- Internet Connected Devices/Equipment: tablets, smart phones, or connected devices to receive connected care services at home (e.g., broadband enabled blood pressure monitors; pulse-ox) for patient or health care provider use; telemedicine kiosks/carts for health care provider site.

Eligible health care providers that purchased telecommunications services, information services, and/or devices in response to the COVID-19 pandemic after March 13, 2020 may apply to receive funding support through the COVID-19 Telehealth Program for eligible services purchased on or after March 13, 2020. In addition, COVID-19 Telehealth Program support will be available to eligible health care providers for services that require monthly recurring charges, such as broadband connectivity or remote patient monitoring services, through September 30, 2020.

Required Information for Application for COVID-19 Telehealth Program

Applicants will be required to submit the following information on their application for the COVID-19 Telehealth Program. The actual wording on the electronic application may vary slightly from the wording in this Public Notice.

Applicant Information

- Applicant Name
- Applicant FCC Registration Number (FRN)
- Applicant National Provider Identifier (NPI)
- Federal Employer Identification Number (EIN/Tax ID)
- Data Universal Number System Number (DUNS)
- Business Type (from Data Accountability and Transparency
- (DATA) Act Business Types) – Applicants may provide up to three business types

Contact Information

- Phone number
- Mailing address
- Email address
(Continued from previous page)

Health Care Provider Information
- Lead health care provider name (if part of a consortium)
- Facility name
- Indicate whether facility is a hospital
- Street address, city, state, county
- FCC Registration Number (FRN)
- Healthcare provider number

Eligibility type
- National Provider Identifier (NPI)
- Total patient population
- Estimated number of patients to be served by the funding request (and supporting documentation)

Medical Services to be Provided (applicants will check all that apply)
- Patient-Based Internet-Connected Remote Monitoring
- Other Monitoring
- Voice Consults
- Other Diagnostics
- Other Services

Conditions to be Treated with COVID-19 Telehealth Funding
- Whether the applicant will treat COVID-19 patients directly
- Whether the applicant will treat patients without COVID-19 symptoms or conditions (applicants will check all that apply):
  - Other infectious diseases
  - Emergency/Urgent Care
  - Routine, Non-Urgent Care
  - Mental Health Services (non-emergency)
  - Other conditions

Additional Information Concerning Requested Services and Devices
- Goals and objectives for use of the COVID-19 Telehealth Program Funding
- Timeline for deployment of the proposed service(s) or devices funded by the COVID-19 Telehealth Program
- Factors/metrics the applicant will use to help measure the impact of the services and devices funded by the COVID-19 Telehealth Program
- How COVID-19 has affected health care providers in your area
- Any additional information about the geographic area and population serve by the applicant. Indicate whether the geographic area you serve has been under any pre-existing strain (e.g., large underserved or low-income patient population; HCP shortages; rural hospital closures; limited broadband access and/or Internet adoption). If so, describe such factors
- Whether the applicant plans to target the funding to high-risk and vulnerable patients. If so, describe how
- Any additional information to support the application and request for funding Requested Funding Items
- Total amount of funding requested

Application and Request for Funding and Registering to Receive Payments Through COVID-19 Telehealth Program

Interested parties must submit an application and request for funding through the COVID-19 Telehealth Program to the Commission. The Bureau will make available an online portal for completing and submitting applications and requests for funding through the COVID-19 Telehealth Program. The Bureau will release a Public Notice and post information about the web address and opening date for that portal on the Commission's Keep Americans Connected page: https://www.fcc.gov/keep-americansconnected. A copy of the completed application will be filed by the system in the Commission’s Electronic Comment Filing System (ECFS) at a later date.

To submit an application and request for funding, the applicant must first obtain an FCC Registration Number (FRN). Additionally, to receive payment through the COVID-19 Telehealth Program, applicants must be registered with the federal System for Award Management. While interested parties do not need to be registered with the System for Award Management in order to submit an application, the Bureau strongly encourages them to start that process early.

Obtaining an FCC Registration Number (FRN)

All applicants, like all other entities doing business with the Commission, must register for an FRN in the Commission Registration System (CORES). An FRN is a 10-digit number that is assigned to a business or individual registering with the FCC. This unique FRN is used to identify the registrant’s business dealings with the FCC. To register with CORES, please use the following link: https://apps.fcc.gov/cores/userLogin.do.

Registering with System for Award Management

To receive payments through the COVID-19 Telehealth Program, applicants must be registered with the federal System for Award Management. The System for Award Management is a web-based, government-wide application that collects, validates, stores, and disseminates business information about the federal government’s partners in support of federal awards, grants, and electronic payment processes. To register with the system, go to https://www.sam.gov/SAM/ with the following information: (1) DUNS number; (2) Taxpayer Identification Number (TIN) or Employment Identification Number (EIN); and (3) Your bank’s routing number, your bank account number, and your bank account type, i.e., checking or savings, to set up Electronic Funds Transfer (EFT). You will receive a confirmation email once the registration is activated. Only applicants registered through the System for Award Management will be able to receive COVID-19 Telehealth Program funding. Registration in the System for Award Management provides the FCC with an authoritative source for information necessary to provide funding to applicants and to ensure accurate reporting pursuant to the DATA Act, Pub. L. 113-101.

Additional Information

For further information regarding this Public Notice, please contact Hayley Steffen, Attorney Advisor, Telecommunications Access Policy Division, Wireline Competition Bureau, Hayley.Steffen@fcc.gov or at (202) 418-1586.

Many people turn to their faith leaders when they have a concern or fear. For many people, even those with no mental health diagnosis, the COVID-19 pandemic has increased fears and concerns exponentially. Sometimes these emotions increase so much that they need to be addressed with specialized expertise that understands mental health concerns. This webinar series will help you consider and prepare for the mental health challenges that may arise during and in the wake of the COVID-19 pandemic. It will include research on mental health and strategies for next steps in the days and months ahead.

“Task-shifting” is a term used to describe when non-mental health professionals are trained to use specific skills when addressing mental health concerns. This strategy is employed when there are not enough mental health professionals available to address the level of mental health needs in a specific community, such as when a natural disaster occurs. With the expected increase of mental health challenges related to COVID-19, our third webinar in this webinar series will highlight faith-based and community groups that are using online training and resources to develop mental health skills in their leaders.

**GUEST SPEAKERS**

- **Jamie Aten, Ph.D.**  
  Founder and Executive Director @Humanitarian Disaster Institute (HDI)
- **Kent Annan, M.Div.**  
  Director @Humanitarian and Disaster Leadership at Wheaton College
- **David H. Rosmarin, PhD, ABPP**  
  Director, Spirituality & Mental Health Program, McLean Hospital, &Founder/Director of the Center for Anxiety

**SAVE THE DATE**

Save the date for our fourth webinar in this series. **June 9, 12:00 p.m. E.T. PART 4: "Connecting Spirituality to Mental Health Services in the Midst of the Crisis" (Registration will open soon)**
The Bipartisan Policy Center is continuing its efforts to improve quality of care through the integration of Medicare and Medicaid services for individuals who are eligible for both programs. These Medicare-Medicaid beneficiaries, commonly known as “dual-eligible individuals,” must navigate two separate programs with different benefits and eligibility requirements. For most individuals, this would be daunting, but for dual-eligible individuals and their families, who are often dealing with chronic conditions and functional limitations, these challenges can be overwhelming.

In August of 2019, BPC began work on policy recommendations to improve care for dual-eligible individuals. In recent months however, the COVID-19 outbreak has become an immediate threat to this vulnerable population. According to the Centers for Disease Control and Prevention (CDC), older adults, especially those above age 65, and individuals of any age with serious underlying medical conditions, such as lung disease, heart conditions, and those undergoing cancer treatment, are at a higher risk of experiencing severe cases of COVID19.

Additionally, individuals living in nursing homes or long-term care facilities are at increased risk of exposure to the virus. Because many dual-eligible individuals fall into one or more of the CDC’s high-risk categories, we believe it is necessary to broaden the scope of the project to include recommendations to limit exposure to COVID-19 for this population. While not directly addressed in this white paper, we hope to include recommendations based on stakeholder feedback in our final report.

In recent years, policymakers have sought to better integrate Medicare and Medicaid services for the estimated 12.2 million dual-eligible individuals. When done well, clinical health, behavioral health, social services, and LTSS are coordinated and provided seamlessly to an eligible individual. Integration efforts have included establishing the Medicare-Medicaid Coordination Office (MMCO) to coordinate programs within the Centers for Medicare & Medicaid Services (CMS), permanent authorization of Medicare Advantage plans designed to serve dual-eligible individuals, facilitating integration by states, and establishing demonstration programs. Many stakeholders, however, believe that more should be done to integrate care. Integration for dual-eligible individuals is especially challenging, given the heterogeneity of the population and the unique and significant needs of the various sub-populations. Many have multiple chronic conditions and may need assistance with activities of daily living, or ADLs, such as bathing or dressing. They may have mental illnesses, cognitive impairments, physical limitations, or a combination of these conditions. While the majority are older Americans, 39% of dual-eligible individuals are under age 65, and less than 10% are enrolled in programs or care models that integrate Medicare and Medicaid services.

The first of the two white papers is on the integration of care for dual-eligible individuals. The purpose of this paper is to provide necessary background on this population of low-income Medicare beneficiaries. The paper discusses important demographics, eligibility for Medicare and Medicaid, covered services under each program, and the implications of being enrolled in both programs. It also discusses different types of integration of Medicare and Medicaid services, and how state and federal policymakers have worked to make the programs function better for those who are enrolled, what has worked, and what has not. The second white paper provides options for consideration by state and federal policymakers, as well as stakeholders representing consumers, providers, and plans. BPC will issue final recommendations in the summer of 2020 and is seeking comments on the second paper.

The Bipartisan Policy Center is seeking feedback on policy options that address how federal and state policymakers can integrate and streamline Medicare and Medicaid benefits for dual-eligible individuals. In light of the COVID-19 pandemic, BPC is also seeking to add recommendations that address policy and regulatory barriers that limit the ability of states, health plans, and providers to address the unique needs of dual-eligible individuals in this time of crisis. BPC recognizes that state and federal policymakers are on the front lines of the crisis. The comment collection period will be open through June 1, 2020.

Multi-Part Virtual Learning Community Webinar Series

Data-Sharing among Criminal Justice and Behavioral Health Partners: Addressing Data-Sharing Agreements and Confidentiality Concerns

Webinar: Wednesday, June 24, 2:00 p.m. to 3:00 p.m. E.T.
Discussion Group: 3:00 p.m. to 4:00 p.m. E.T.

In 2019, SAMHSA released the publication Data across the Sequential Intercept Model: Essential Measures to help support jurisdictions interested in using data to better understand and improve the outcomes of people with mental and/or substance use disorders who come into contact with the criminal justice system. This webinar will provide a deep dive into this publication with further guidance on how to apply the information in practice. We will discuss the recommended measures at each intercept, ways to use the data, challenges in obtaining the data, and more. Presenters will share about the work they are doing locally to facilitate effective data and information sharing.

OBJECTIVES:

- Learn essential measures that are helpful for jurisdictions to prioritize when starting data and information sharing efforts.
- Understand common barriers to data and information sharing and ways to overcome those barriers.
- Apply information provided in the publication, Data across the Sequential Intercept Model: Essential Measures, to efforts being done at the city or county level.

Register to stick around afterward for a discussion group with the following experts:

- Jesse Benet, M.A., LMHC, Deputy Director, Public Defender Association, King County, Washington
- Tyler Corwin, M.A., Behavioral Health Evaluation Lead, Department of Community and Human Services, King County, Washington
- Melissa Neal, Dr. P.H., Senior Research Associate, Policy Research Associates, Inc.
- Stephanie Robertson, M.B.A., M.S.W., Contract Compliance Coordinator, Division of Community Corrections, City and County of Denver, Denver, Colorado

Navigating System Cultures Across the Sequential Intercept Model (SIM)

Webinar: Friday, June 26, 2:30 p.m. to 4:00 p.m. E.T.

Multiple systems across the SIM serving justice-involved people with mental and substance use disorders employ differing language, procedures, and standards when addressing the complex needs of clients requiring treatment and recovery support. This webinar, hosted by SAMHSA’s GAINS Center, will provide participants with practical strategies for navigating diverse system cultures across multiple points of the SIM to better serve individuals with mental and/or substance use disorders who are interfacing with the justice system.

Peer Support Services Research
Archived Video Presented by the National Association of Peer Supporters (iNAPS)

Peer services are one solution to address the health and wellness needs for people with serious mental illness who get sick and die 15 years earlier than their same-age peers. Peer supporters are providers with lived experience who are in recovery. They enhance service engagement by directly assisting individuals with help-seeking.

This archived YouTube webinar will educate viewers about the roles and responsibilities of utilizing peer services and review the empirical findings of service effectiveness.

Leading Edge Acceleration Projects in Health Information Technology
Notice of Funding Opportunity (NOFO)

The Leading Edge Acceleration Projects (LEAP) in Health IT funding opportunity will address well-documented and fast emerging challenges that inhibit the development, use, and/or advancement of well-designed, interoperable health IT. It is expected to further a new generation of health IT development and inform the innovative implementation and refinement of standards, methods, and techniques for overcoming major barriers and challenges as they are identified.

FY 2020 Special Emphasis Notice (SEN)

Description

The Office of the National Coordinator for Health Information Technology (ONC) has published a special emphasis notice (SEN) under the Leading Edge Acceleration Projects (LEAP) in Health Information Technology (Health IT) funding opportunity NAP-AX-18-003 to address the development and testing of data sharing functionalities to support clinical care, research, and improved health care outcomes.

In fiscal year 2020, ONC is particularly interested in applications whose specific aims addresses one of the following areas of interest:

- **Area 1:** Advancing Registry Infrastructure for a Modern API-based Health IT Ecosystem
- **Area 2:** Cutting Edge Health IT Tools for Scaling Health Research
- **Area 3:** Integrating Health Care and Human Services Data to Support Improved Outcomes

NASMHPD continues to receive recognition from the behavioral health community at large, including from our friends at SAMHSA, for our 2017 and 2018 Beyond Beds series of papers highlighting the importance of providing a continuum of care beyond institutional inpatient care.

A 2019 multiple-paper follow-up to the Beyond Beds series is now up on the NASMHPD website. The 2019 papers take the Beyond Beds theme to look at additional innovative approaches offered in the community and factors impacting those services, covering such topics as early antipsychotic prescribing practices in nursing homes, developing a behavioral health workforce, a public health approach to trauma and addiction, addressing behavioral health in traumatic brain injury treatment, recovery-oriented cognitive therapy, integration of mental health and substance use services for those with co-occurring conditions, schools as part of the continuum of care for children and adolescents, and addressing social and mental health needs in transition-age homeless youth.

One of those papers, Lessons from the International Community to Improve Mental Health Outcomes, authored by Deborah Pinals, M.D., chair of the NASMHPD Medical Directors Division and Medical Director, Behavioral Health and Forensic Programs in the Michigan Department of Health and Human Services, pivots from NASMHPD’s previous work in this series to look beyond the borders of the United States to other countries for examples of successful and promising strategies across nine areas of focus. The paper’s highlighted examples from the international community aim to further illuminate strategies and inspire ongoing crucial dialogue in an effort to improve mental health in the United States.

Following are links to the other reports in the 2019 Technical Assistance Coalition series.

Effects of CMS’ Measure of Antipsychotic Prescribing Practices for Nursing Facilities on Utilization of Antipsychotic Medications and Changes in Diagnostic Patterns

Developing a Behavioral Health Workforce Equipped to Serve Individuals with Co-Occurring Mental Health and Substance Use Disorders

A Public Health Approach to Trauma and Addiction

Traumatic Brain Injury and Behavioral Health Treatment

Recovery-Oriented Cognitive Therapy: a Theory-Driven, Evidence-Based, Transformative Practice to Promote Flourishing for Individuals with Serious Mental Health Conditions that is Applicable across Mental Health Systems

Integrated Systems and Services for People with Co-Occurring Mental Health and Substance Use Conditions: What’s Known, What’s New, and What’s Now?

Schools as a Vital Component of the Child and Adolescent Mental Health System

Addressing Intersecting Social and Mental Health Needs among Transition-Aged Homeless Youth

The NASMHPD Technical Assistance Coalition series will continue in 2020.
On March 6, 2020, the President signed the Coronavirus Preparedness and Response Supplemental Appropriations Act, 2020 (P.L. 116-123). This bill provides $8.3 billion in emergency funding for federal agencies to respond to the coronavirus pandemic. Of this funding, $950 million is specifically directed for grants or cooperative agreements to states, localities, territories, and tribes, no less than $40 million of which shall be allocated to tribes, tribal organizations, urban Indian health organizations, or health service providers to tribes.

CDC is taking a multifaceted approach to allocate COVID-19 funding to Indian Country. This approach aims to get public health resources out quickly during this declared emergency and enable broad access to the opportunity for COVID-19 resources across all tribal nations. This approach also must reflect the statutory requirements of the Coronavirus Preparedness and Response Supplemental Appropriations Act, 2020.

CDC’s Center for State, Tribal, Local, and Territorial Support (CSTLTS) is coordinating the following funding opportunity to expedite the release of COVID-19 response resources to support tribal communities:

**Noncompetitive Grant: Supporting Tribal Public Health Capacity in Coronavirus Preparedness and Response**

**CDC-RFA-OT20-2004**

**Application Deadline: May 31, 2020, 11:59 p.m. (E.T.)**

This emergency funding opportunity is designed to fund federally recognized tribes that contract or compact with the Indian Health Service under Title I and Title V of the Indian Self-Determination and Education Assistance Act, or consortia of these tribes, or their bona fide agents. All federally recognized tribes, tribal organizations, consortia of federally recognized tribes, or their bona fide agents should apply for this announcement to be considered for future funding under this announcement. During a national emergency, these organizations are uniquely positioned to provide emergency preparedness and response support for tribal health departments and other components of the tribal public health system.

All federally recognized tribes, tribal organizations, consortia of federally recognized tribes, or their bona fide agents should apply for this announcement to be considered for future funding under this announcement. The purpose of this emergency funding is to conduct the following public health activities in response to COVID-19:

- Emergency operations and coordination
- Health Information Technology
- Surveillance and epidemiology
- Laboratory capacity
- Communications
- Countermeasures and mitigation
- Recovery activities
- Other preparedness and response activities to COVID-19.

Student Mental Health: Responding to the Crisis  
*Mary Ward House Conference & Exhibition Centre, London*  
Tuesday, October 6, 2020

This conference will break-down the cultures, economic factors, social and institutional pressures contributing to dramatic rises in disclosures of mental health issues at universities and student suicides.

Delegates will explore why more students are turning to unconventional incomes like gambling and sex work during their studies, how the university experience can compound cultural and environmental conditions that lead students to access and supply drugs; and discussing how cross-institutional co-operation as well as legislative review of attitudes towards information sharing could prevent students reaching a point of crisis.

With just over two months to go to this expected sell out event places are now at a premium. However you can still...
Mental Health Considerations During the COVID-19 Outbreak

In January 2020 the World Health Organization (WHO) declared the outbreak of a new coronavirus disease in Hubei Province, China to be a Public Health Emergency of International Concern. WHO stated there is a high risk of the 2019 coronavirus disease (COVID-19) spreading to other countries around the world.

WHO and public health authorities around the world are taking action to contain the COVID-19 outbreak. However, this time of crisis is generating stress in the population. These mental health considerations were developed by the Mental Health Department as support for mental and psychological well-being during COVID-19 outbreak.

For the General Population

1. COVID-19 has and is likely to affect people from many countries, in many geographical locations. Don’t attach it to any ethnicity or nationality. Be empathetic to those who got affected, in and from any country, those with the disease have not done anything wrong.

2. Don’t - refer to people with the disease as “COVID-19 cases”, “victims” “COVID-19 families” or the “diseased”. They are “people who have COVID-19”, “people who are being treated for COVID-19”, “people who are recovering from COVID-19” and after recovering from COVID-19 their life will go on with their jobs, families and loved ones.

3. Avoid watching, reading or listening to news that cause you to feel anxious or distressed; seek information mainly to take practical steps to prepare your plans and protect yourself and loved ones. Seek information updates at specific times during the day once or twice. The sudden and near-constant stream of news reports about an outbreak can cause anyone to feel worried. Get the facts. Gather information at regular intervals, from WHO website and local health authorities platforms, in order to help you distinguish facts from rumors.

4. Protect yourself and be supportive to others. Assisting others in their time of need can benefit the person receiving support as well as the helper.

5. Find opportunities to amplify the voices, positive stories and positive images of local people who have experienced the new coronavirus (COVID-19) and have recovered or who have supported a loved one through recovery and are willing to share their experience.

6. Honor caretakers and healthcare workers supporting people affected with COVID-19 in your community. Acknowledge the role they play to save lives and keep your loved ones safe.

For Health Care Workers

7. For health workers, feeling stressed is an experience that you and many of your health worker colleagues are likely going through; in fact, it is quite normal to be feeling this way in the current situation. Stress and the feelings associated with it are by no means a reflection that you cannot do your job or that you are weak. Managing your stress and psychosocial wellbeing during this time is as important as managing your physical health.

8. Take care of your basic needs and employ helpful coping strategies— ensure rest and respite during work or between shifts, eat sufficient and healthy food, engage in physical activity, and stay in contact with family and friends. Avoid using unhelpful coping strategies such as tobacco, alcohol or other drugs. In the long term, these can worsen your mental and physical well-being. This is a unique and unprecedented scenario for many workers, particularly if they have not been involved in similar responses. Even so, using the strategies that you have used in the past to manage times of stress can benefit you now. The strategies to benefit feelings of stress are the same, even if the scenario is different.

9. Some workers may unfortunately experience avoidance by their family or community due to stigma or fear. This can make an already challenging situation far more difficult. If possible, staying connected with your loved ones including through digital methods is one way to maintain contact. Turn to your colleagues, your manager or other trusted persons for social support— your colleagues may be having similar experiences to you.

10. Use understandable ways to share messages with people with intellectual, cognitive and psychosocial disabilities. Forms of communication that do not rely solely on written information should be utilized. If you are a team leader or manager or in a health facility.

11. Keeping all staff protected from chronic stress and poor mental health during this response means that they will have a better capacity to fulfill their roles.

12. Ensure good quality communication and accurate information updates are provided to all staff. Rotate workers from high-stress to lower-stress functions. Partner inexperienced workers with more experienced colleagues. The buddy system helps to provide support, monitor stress and reinforce safety procedures. Ensure that outreach personnel enter the community in pairs. Initiate, encourage and monitor work breaks. Implement flexible schedules for workers who are directly impacted or have a family member impacted by a stressful event.

13. If you are a team leader or manager in a health facility, facilitate access to, and ensure staff are aware of where they can access mental health
Mental Health Considerations During the COVID-19 Outbreak (cont’d)

(Continued from page 14) and psychosocial support services. Managers and team leads are also facing similar stressors as their staff, and potentially additional pressure in the level of responsibility of their role. It is important that the above provisions and strategies are in place for both workers and managers and that managers are able to role-model self-care strategies to mitigate stress.

14. Orient responders, including nurses, ambulance drivers, volunteers, case identifiers, teachers and community leaders and workers in quarantine sites, on how to provide basic emotional and practical support to affected people using psychological first aid.

For Caretakers of Children

15. Help children find positive ways to express disturbing feelings such as fear and sadness. Every child has his/her own way to express emotions. Sometimes engaging in a creative activity, such as playing, and drawing can facilitate this process. Children feel relieved if they can express and communicate their disturbing feelings in a safe and supportive environment.

16. Keep children close to their parents and family, if considered safe for the child, and avoid separating children and their caregivers as much as possible. If a child needs to be separated from his/her primary caregiver, ensure that appropriate alternative care is and that a social worker, or equivalent, will regularly follow up on the child. Further, ensure that during periods of separation, regular contact with parents and caregivers is maintained, such as twice-daily scheduled phone or video calls or other age-appropriate communication (e.g., social media depending on the age of the child).

17. Maintain familiar routines in daily life as much as possible, especially if children are confined to home. Provide engaging age appropriate activities for children. As much as possible, encourage children to continue to play and socialize with others, even if only within the family when advised to restrict social contract.

18. During times of stress and crisis, it is common for children to seek more attachment and be more demanding on parents. Discuss the COVID-19 with your children in honest and age-appropriate information. If your children have concerns, addressing those together may ease their anxiety. Children will observe adults’ behaviors and emotions for cues on how to manage their own emotions during difficult times.

For Caretakers of Older Adults

19. Older adults, especially in isolation and those with cognitive decline/dementia, may become more anxious, angry, stressed, agitated, and withdrawn during the outbreak/while in quarantine. Provide practical and emotional support through informal networks (families) and health professionals.

20. Share simple facts about what is going on and give clear information about how to reduce risk of infection in words older people with/without cognitive impairment can understand. Repeat the information whenever necessary. Instructions need to be communicated in a clear, concise, respectful and patient way. and it may also be helpful for information to be displayed in writing or pictures. Engage their family and other support networks in providing information and helping them practice prevention measures (e.g. handwashing etc.)

21. Encourage older adults with expertise, experiences and strengths to volunteer in community efforts to respond to the COVID-19 outbreak (for example the well/healthy retired older population can provide peer support, neighbor checking, and childcare for medical personnel restricted in hospitals fighting against COVID-19.)

For People in Isolation

22. Stay connected and maintain your social networks. Even in situations of isolations, try as much as possible to keep your personal daily routines. If health authorities have recommended limiting your physical social contact to contain the outbreak, you can stay connected via e-mail, social media, video conference and telephone.

23. During times of stress, pay attention to your own needs and feelings. Engage in healthy activities that you enjoy and find relaxing. Exercise regularly, keep regular sleep routines and eat healthy food. Keep things in perspective. Public health agencies and experts in all countries are working on the outbreak to ensure the availability of the best care to those affected.

24. A near-constant stream of news reports about an outbreak can cause anyone to feel anxious or distressed. Seek information updates and practical guidance at specific times during the day from health professionals and WHO website and avoid listening to or following rumors that make you feel uncomfortable.

Centers for Disease Control (NCIPC) Forecast Funding Opportunity Announcement
Preventing Adverse Childhood Experiences through Essentials for Childhood
(CDC-RFA-CE20-2006)

Funding Mechanism: Grant
Anticipated Number of Awards: 5
Length of Project: Up to 5 Years
Estimated Post Date: May 1, 2020
Estimated Award Date: Aug 01, 2020

Anticipated Total Available Funding: $6.3 million
Award Amount: $420,000 to $525,000
Cost Sharing/Match Required?: Yes
Estimated Application Due Date: Jun 30, 2020
Estimated Project Start Date: Sep 01, 2020

The purpose of this funding is to support recipients in measuring, tracking, and preventing adverse childhood experiences (ACEs) in their states. Adverse Childhood Experiences (ACEs) are preventable, potentially traumatic events that occur in childhood (0-17 years) such as experiencing violence, abuse, or neglect; witnessing violence in the home; and having a family member attempt or die by suicide. Also included are aspects of the child’s environment that can undermine their sense of safety, stability, and bonding such as growing up in a household with substance misuse, mental health problems, or instability due to parental separation or incarceration of a parent, sibling or other member of the household. Currently, ACEs are difficult to track over time because they do not always come to the attention of agencies that compile publicly available administrative data and because the best surveillance data currently available for ACEs, such as those collected through the Behavioral Risk Factor Surveillance System (BRFSS), are from retrospective surveys with adults. These challenges make it difficult to assess current prevalence, track change over time, target prevention strategies, and measure the success of prevention strategies. In addition, to date, efforts to implement data-driven, comprehensive, evidence-based prevention strategies have been lacking in communities across the U.S.

This NOFO will support the implementation of data-driven, comprehensive, evidence-based prevention strategies by building a surveillance infrastructure for the collection, analysis, and application of such ACEs data, so that states can monitor the prevalence of ACEs experiences among youth within their states and then use those data to inform prevention efforts at the state and community level. In tandem, this NOFO also provides resources to support states in implementing primary prevention strategies for preventing ACEs. Therefore, there are two overall required components of this award – a surveillance component and a prevention component. The work of these components, and the infrastructure and expertise exerted to accomplish that work, should be interdependent and should be planned and implemented as part of a dynamic system that reflects the 10 Essential Public Health Services promoted by CDC.

## Agency for Healthcare Research and Quality (AHRQ) Funding Opportunity Announcement

**Notice of Intent: Revision Supplements to Existing AHRQ Grants and Cooperative Agreements to Address Health System Responsiveness to COVID-19 (NOT-HS-20-007)**

AHRQ intends to publish a new funding notice allowing requests for urgent revision supplements to existing AHRQ grants and cooperative agreements to address health system responsiveness to COVID-19. AHRQ intends to allow grantees with active AHRQ research grants to submit requests for competitive revision supplements to address timely health system and healthcare professional response to COVID-19. Grant activity codes to be included or excluded from the funding notice will be specified in the announcement.

It is expected that competitive revision supplement requests will capitalize on the expertise of grant personnel and the institutional environment to expand the specific aims of the ongoing research to develop high-impact new knowledge concerning COVID-19. Competitive revision supplements will be limited in duration (perhaps 12 months). The amount of supplemental funds that may be requested will be limited, and will be specified in the funding notice. AHRQ expects to make at least $2.5M available to fund meritorious revision supplements in FY2020. AHRQ plans to release the supplement announcement in April 2020 with an opening date in mid-May.

Please also see AHRQ’s Notice of Intent to publish a new FOA requesting new competitive applications targeting the evaluation of health system responsiveness to COVID-19 9 (NOT-HS-20-008: Notice of Intent: New Funding Opportunity Announcement to Support Novel, High-Impact Studies Evaluating Health System and Healthcare Professional Responsiveness to COVID-190.

Please direct all inquiries to:

Lisa Scott-Morring, MS, MSHS, CRA;, Director, Division for Policy, Coordination and Analysis, Office of Extramural Research, Education, and Priority Populations, Agency for Healthcare Research and Quality, HHS. Email: Grant_Queries@ahrq.hhs.gov

---

The MHDD-NTC is a collaboration between the University Centers for Excellence in Developmental Disabilities at the University of Kentucky, University of Alaska Anchorage, and Utah State University.

Established in 2018 through funding provided by the Administration for Community Living, the training center aims to improve mental health services and supports for people with developmental disabilities. By serving not only as a training center, but also as a national clearinghouse, the training center helps provide access to the most current evidence-based, trauma-informed, culturally responsive practices that address the mental health needs of individuals with developmental disabilities. Please visit their website at [https://mhddcenter.org/](https://mhddcenter.org/)
# Approved COVID-19 Medicaid State Plan Amendments

Web Conference: Role of Telehealth in Increasing Access to Care and Improved Healthcare Quality
Tuesday, June 9, 2:00 p.m. to 3:30 p.m. E.T.

AHRQ is hosting this web conference to discuss how telehealth can increase access to care and improve healthcare quality. Specifically, presenters will discuss their work on the effectiveness of telepsychiatry, the impact of telemedicine on chronic disease management, and the facilitators and barriers to urban telemedicine adoption. Presenters will also discuss how the evidence can be used routinely and during public health emergencies such as a pandemic.

Target Audience: Healthcare researchers, physicians, physician assistants, nurses, pharmacists, and other healthcare professionals, health IT researchers, and vendors.

Presenters:
- Glen Xiong, M.D., Clinical Professor, Dept. of Psychiatry & Behavioral Sciences, Dept. of Neurology, Alzheimer’s Disease Center, University of California at Davis
- Elizabeth D. Ferucci, M.D., M.P.H., Clinical Rheumatologist and Researcher, Alaska Native Tribal Health Consortium
- Kenneth McConnochie, M.D., M.P.H., Professor Emeritus, University of Rochester Medical Center New York at Buffalo
- Commander Derrick L. Wyatt, USPHS Commissioned Corps, Division of Health IT Research Grants Manager, Center for Evidence and Practice Improvement at AHRQ

Register HERE

CE/CME accreditation of this activity is pending; if approved, eligible providers can earn up to 1.5 CE/CME contact hours for participating in the live web conference.

ON-LINE COURSE - 330.610.89 - Knowledge for Managing County and Local Mental Health, Substance Use, and Developmental Disability Authorities

Location: Internet  Term: Summer Inst. Term  Department: Mental Health

Credits: 1 credits  Academic Year: 2020 – 2021

Dates: Tue 05/26/2020 - Wed 06/10/2020

Auditors Allowed: Yes, with instructor consent

Grading Restriction: Letter Grade or Pass/Fail

Course Instructor: Ronald Manderscheid

Contact: Ronald Manderscheid

Frequency Schedule: One Year Only

Resources:
- CoursePlus
- Evaluations

Description:

Reviews the key features of successful management of county and local authorities that oversee and conduct mental health, substance use, and developmental disability services. Also explores environmental factors that impact local operations, as well as facility with key tools to plan and implement services. Specifically explores two principal environmental factors, i.e., National Health Reform and Medicaid, and two primary tools for management, i.e., strategic planning and needs assessment. Emphasizes practical knowledge so that managers can apply the information immediately upon returning. No consent required to their programs. Students are expected to bring practical problems to the course and to leave with useful strategies and tools for solving them.

Learning Objectives:

Upon successfully completing this course, students will be able to:

1. Assess the impact of National Health Reform and Medicaid on their own programs and will be able to employ useful strategic planning and needs assessment tools
2. Describe the essential features of National Health Reform and the Medicaid Program
3. Engage successfully in local strategic planning and needs assessment initiatives

Methods of Assessment:

This course is evaluated as follows:

- 35% Participation
- 65% Final Paper

Instructor Consent: No consent required.

Special Comments: Project is due June 30, 2020
Webinar Series: Recovery from Serious Mental Illness (SMI)

The Northeast and Caribbean MHTTC is proud to offer a webinar series on: **Recovery from Serious Mental Illness (SMI) and the Practices that Support Recovery.** This series will introduce the participant to recovery from SMI and many of the evidence-based and promising practices that support recovery.

**Upcoming events in the series (all events take place from 1:00 p.m. to 2:30 p.m. E.T.):**

**May 21-** *Recovery in the Hispanic and Latinx Community: What is the Understanding of Recovery in the Hispanic and Latina Community and How Can We Support It*

**Training and Technical Assistance Related to COVID-19 Resources**

**Responding to COVID-19:** highlight products and resources that can be useful when coping with the effects of widespread public health crises such as:

- Psychosocial Impacts of Disasters: Assisting Community Leaders
- Supportive Practices for Mental Health Professionals During Pandemic-Related Social Distancing

**Recorded Webinars:** • [Substance Use Disorder Services in the Days of a Pandemic: You Need A Bigger Boat!](https://attcnetwork.org/centers/global-attc/otp-questions-during-challenging-times-form)

**ATTC Resources: OTP Questions Regarding Sustaining Operations During the Uncertain and Turbulent Times**

AATOD, ATTCs, and AAAP are collecting questions from OTPs related to sustaining care, providing support and maintaining a safe work environment for staff during these turbulent and uncertain times. We will compile all questions, work with field experts to determine responses, and develop and disseminate a "FAQ" document. [https://attcnetwork.org/centers/global-attc/otp-questions-during-challenging-times-form](https://attcnetwork.org/centers/global-attc/otp-questions-during-challenging-times-form)

**Compassion Fatigue and the Behavioral Health Workforce Curriculum Infusion Package** - This 5-part Curriculum Infusion Package (CIP) on Compassion Fatigue and the Behavioral Health Workforce was developed in 2020 by the Pacific Southwest Addiction Technology Transfer Center (PSATTC). Part 1 provides a brief overview of the behavioral health workforce and associated shortages, and introduces the demands on the workforce. Part 2 focuses on compassion fatigue and secondary traumatic stress. Part 3 provides a brief overview of how organizations can help individuals avoid experiencing burnout. Part 4 focuses on actions that behavioral health professionals can take to prevent compassion fatigue. And Part 5 focuses on self-care as an ethical duty in order to manage compassion fatigue.

**Educator Wellness Webinars-** (The Educator Wellness Webinar Series is part of The Well-Being Series - Connections During COVID-19: Mental Wellness Webinars for Families and Educator) - Hosted by Northwest MHTTC

**Trying to Change that Negative Loop of Self-Criticism and Perfectionism? Mindfulness Practices Can help!**

May 15, 1:00 p.m. to 2:30 p.m. P.T./ 4:00 p.m. to 5:30 p.m. E.T. [Register HERE](https://attcnetwork.org/centers/global-attc/otp-questions-during-challenging-times-form)

**Cultivating a Practice of Gratitude and Appreciation in Your School Community**

June 3, 1:00 p.m. to 2:30 p.m. P.T./ 4:00 p.m. to 5:30 p.m. E.T. [Register HERE](https://attcnetwork.org/centers/global-attc/otp-questions-during-challenging-times-form)

Mental Health & Wellness Guide for Public Service Professionals

Being able to make a positive impact is what makes working in a public service field so special. From the school social worker keeping a group of at-risk teens on track to graduate, to the rookie cop protecting the neighborhood she grew up in, to the critical care nurse pulling a double shift during a healthcare crisis, public service professionals represent the best in all of us. Yet this same capacity and desire to do good often comes at the cost of mental health and wellness. Being overworked, dealing with life-and-death situations, and concerns over funding are just a few of the triggers that can lead to serious issues like compassion fatigue, burnout, and traumatic stress. And when symptoms do arise, it can be hard to ask for help when you’re the one who usually provides it.

This guide explores mental health issues that public service professionals are most at risk for, the common stressors that cause them, and solutions and resources to get well. While this guide is not meant to (and should not) replace professional medical advice, it can help serve as a starting point for understanding and dealing with the mental health challenges of being in a helping career.

Access the Guide HERE
This Funding Opportunity Announcement (FOA) supports pilot work for subsequent studies testing the effectiveness of strategies to deliver evidence-based mental health services, treatment interventions, and/or preventive interventions (EBPs) in low-resource mental health specialty and non-specialty settings within the United States. The FOA targets settings where EBPs are not currently delivered or delivered with fidelity, such that there are disparities in mental health and related functional outcomes (e.g., employment, educational attainment, stable housing, integration in the community, treatment of comorbid substance use disorders, etc.) for the population(s) served. Implementation strategies should identify and use innovative approaches to remediate barriers to provision, receipt, and/or benefit from EBPs and generate new information about factors integral to achieving equity in mental health outcomes for underserved populations. Research generating new information about factors causing/reducing disparities is strongly encouraged, including due consideration for the needs of individuals across the life span. Applications proposing definitive tests of an implementation strategy should respond to the companion R01 announcement RFA-MH-20-400.

This initiative supports pilot work in support of subsequent studies testing the effectiveness of strategies to deliver EBPs in low-resource settings in the United States, in order to reduce disparities in mental health and related functional outcomes (e.g., employment, educational attainment, stable housing, integration in the community, treatment of co-morbid substance use disorders, etc.) for the population(s) served. Of interest are settings where a significant number of children, youth, adults, or older adults with or at risk for mental illnesses can be found and evidence-based mental health treatments or services are not currently delivered. Applications focused on developmental work that would enhance the probability of success in subsequent larger scale projects are also encouraged.

Developmental work might include: refining details of the implementation approach; examining the feasibility of novel approaches and technologies; examining the feasibility of data collection including administration of instruments, obtaining administrative or other types of data, etc.; enhancing the protocol for the comparison group and randomization procedures (if appropriate); examining the feasibility of recruiting and retaining participants into the study condition(s); and developing and testing supportive materials such as training curricula. Therefore, collection of preliminary data regarding feasibility, acceptability and engagement of intervention targets is appropriate. However, given the intended pilot nature of the R34 activity code, conducting fully powered tests of outcomes or attempting to obtain an estimate of an effect size may not be feasible.

The goal of this FOA is to conduct pilot work in support of subsequent studies that develop and test the effectiveness of scalable implementation strategies to achieve delivery of EBPs with high fidelity in low-resource settings and significantly improve clinical and functional outcomes toward greater equity with outcomes documented in the general population studies.

Eligibility

Public/State Controlled Institutions of Higher Education

Private Institutions of Higher Education

The following types of Higher Education Institutions are always encouraged to apply for NIH support as Public or Private Institutions of Higher Education:

- Hispanic-serving Institutions
- Historically Black Colleges and Universities (HBCUs)
- Tribally Controlled Colleges and Universities (TCCUs)
- Alaska Native and Native Hawaiian Serving Institutions
- Asian American Native American Pacific Islander Serving Institutions (AANAPISIs)

Nonprofits with and without 501(c)(3) IRS Status (Other than Institutions of Higher Education)

Small Businesses

For-Profit Organizations Other Than Small Businesses

State Governments

County Governments

City or Township Governments

Special District Governments

Indian/Native American Tribal Governments (Federally Recognized & Other than Federally Recognized)

U.S. Territories or Possessions

Independent School Districts

Public Housing Authorities

Indian Housing Authorities

Native American Tribal Organizations (other than Federally recognized tribal governments)

Faith-Based or Community-Based Organizations

Regional Organizations

NOT Eligible to Apply: Non-domestic (non-U.S.) Entities (Foreign Institutions). Non-domestic (non-U.S.) components of U.S. Organizations. Foreign components, as defined in the NIH Grants Policy Statement.
NOW RECRUITING

CSC OnDemand: An Innovative Online Learning Platform for Implementing Coordinated Specialty Care

Combining the strongest components of OnTrack and the evidence-based Individual Resilience Training (IRT) of NAVIGATE, C4 Innovations is offering a new training in coordinated specialty care. This is an ideal opportunity for teams to receive new or refresher training in CSC. The tool will offer scalable, efficient professional development for CSC teams.

Now recruiting both new and already-established CSC teams interested in participating in a research study. Our goal is to test our new training tool with practitioners in the field. Your feedback will help refine the tool, share what we learn, and improve services for people experiencing first episode psychosis.

What Can Teams EXPECT?

- Comprehensive, role-specific training for all team members, including peers, offered at no charge to teams
- Courses, consultation calls, and a community of practice led by experts in the field. See reverse for full list of expert trainers.
- Opportunity for refresher training for existing teams and teams with new members.
- Teams will be randomized into two groups:
  - Group 1 teams will receive training on June 24 – June 26
  - Group 2 will receive training between July 8 – July 24
- Opportunity to provide critical feedback on a new CSC training tool

HOW CAN MY AGENCY TAKE PART?

Call our Research Coordinator, Effy: 347-762-9086
Or email: cscstudy@center4si.com
OUR CSC ONDEMAND TRAINERS

Iruma Bello, PhD | Clinical Training Director, OnTrackNY
Dr. Bello is an Assistant Professor of Clinical Psychology in Psychiatry. She is also the Clinical Training Director of OnTrackNY at the Center for Practice Innovations within the Division of Behavioral Health Services and Policy Research at Columbia University. She graduated with her PhD in Clinical Psychology from the University of Hawaii- Honolulu.

Abaigael Duke | Recovery Specialist and Trainer, OnTrackNY
A NYS certified peer specialist, Abaigael currently serves as a Recovery Specialist and Trainer for OnTrack NY. She has worked as a peer specialist in a variety of settings through the NYS Office of Mental Health, including clinics and as a member of an ACT team. She was based in the OMH NYC field office as an Advocacy Specialist in the Children’s Services division.

Susan Gingerich, MSW | Training Coordinator, NAVIGATE
Susan Gingerich has been closely involved with the NAVIGATE First Episode of Psychosis program since 2009, helping to develop all the manuals and providing consultation calls for the directors of 17 NAVIGATE programs during the research phase of The Recovery After An Initial Schizophrenia Episode (RAISE) initiative. She is currently the training coordinator for the NAVIGATE Program.

Thomas Jewell, PhD | Project Manager, Center for Practice Innovations (CPI) Division of Behavioral Health Services and Policy Research
Tom Jewell, PhD is on the staff of the CPI, Columbia University, New York State Psychiatric Institute and the Department of Psychiatry at the University of Rochester, School of Medicine and Dentistry. His specialty has been in evaluation and research into evidenced-based practices. He is a family intervention trainer with OnTrackNY, which deals with first episode psychosis.

Nev Jones, PhD | Assistant Professor, University of South Florida | Department of Mental Health Law & Policy | Louis de la Parte Florida Mental Health Institute
Dr. Jones received her Ph.D. from DePaul University, followed by a postdoctoral fellowship at Stanford University in medical anthropology and psychiatry. Dr. Jones has worked in leadership positions in both state government and nonprofit community mental health. Her research covers social, cultural and structural determinants of disability and recovery, youth and young adult behavioral health services, and peer and family support.

Piper Meyer-Kalos, PhD, LP | Director of Research and Evaluation, Minnesota Center for Chemical and Mental Health
Piper Meyer-Kalos, PhD, HCP-P, holds her doctoral degree in Clinical Rehabilitation Psychology from Indiana University – Purdue University, Indianapolis and specializes in psychiatric rehabilitation and treatment for FEP with interests in recovery, positive psychology, and psychosocial treatment for people with severe mental illness. Since 2009, Dr. Meyer-Kalos has been part of the psychosocial development team of RAISE project and has co-led the individual therapy component (IRT).

Ilana Nossel, MD | Medical Director, OnTrackNY | Assistant Professor, Columbia University Medical Center
Dr. Nossel practices general adult psychiatry, including consultation, psychotherapy and medication management. She currently serves as the Medical Director of OnTrack NY. She previously worked as Associate Director of the PI Residents Clinic and completed a pilot study adapting Critical Time Intervention (CTI) for frequent users of the psychiatric emergency room.

Gary Scannevin, Jr., M.P.S., CPRP | IPS Trainer Center for Practice Innovations (CPI) Division of Behavioral Health Services and Policy Research, New York State Psychiatric Institute
Gary has worked in the mental health sector of healthcare for 29 years. He is currently an IPS Trainer at the CPI at Columbia University Psychiatry, where his primary mission is training Supported Education and Employment Specialists (SEES) in both OnTrackNY and OnTrackUSA.

Delbert Robinson, MD | Associate Professor, The Center for Psychiatric Neuroscience, Feinstein Institutes for Medical Research
Dr. Robinson has led NIMH-funded studies focused upon first episode schizophrenia, tools to enhance antipsychotic medication adherence, and obsessive-compulsive disorder. For the RAISE-ETP study, he chaired the Psychopharmacological Treatment Committee. He was the primary developer of the Medications manual for RAISE-ETP and has provided training and consultation for NAVIGATE prescribers since 2009.
Zero Suicide International 5
May 10 to 12
POSTPONED TO EARLY FALL, 2020, Anfield Stadium, Liverpool, UK
in Partnership with Mersey Care NHS Foundation Trust

Leaders from countries around the world came together in Rotterdam, the Netherlands in September 2018 for Zero Suicide International 4. As a result, the 2018 International Declaration was produced with a video complement, The Zero Suicide Healthcare Call to Action.

During the fifth international summit, our goal is to identify the three next key steps through inspiration, ideation, and implementation.

Please note a key change for 2020: Prior ZSI events have been invitation only. Our first three events in 2014, 2015, and 2017 were all part of the International Initiative for Mental Health Leadership (IIMHL) events and followed their small match meeting format (with 40 to 70 participants only), with Rotterdam in 2018 being the first ZSI event to stand on its own (over 100 leaders joined). For Liverpool 2020, we will partner with Joe Rafferty and, together with the Zero Suicide Alliance hosting up to 500 or more in the Liverpool Football Club. For the first time, no invitation will be required and all interested in advancing safer healthcare are welcome to join.

In order to ensure the Liverpool summit maintains the strong focus on networking and action steps of our prior more intimate convenings, we are working with the Flourishing Leadership Institute and their amazing team experienced in whole-system transformation. We’ll be harnessing the complete power of the group’s collective experience and imagination to drive forward the next successes in Zero Suicide Healthcare, and everyone who participates will be engaged.

Interested in becoming a sponsor? Contact karen.jones@riinternational at RI International or justine.maher@merseycare.nhs.uk at Mersey Care for details on available sponsorship packages. We’re excited the American Foundation for Suicide Prevention has again committed their support and look forward to connecting with many others who will help us make this event and its outcomes a success.

Nominate a Dr. Jan Mokkenstorm International Zero Suicide Visionary Award Winner

This year’s International Zero Suicide Summit will be bittersweet as our first without our beloved colleague Jan Mokkenstorm. During the Summit in Liverpool, the first annual Jan Mokkenstorm Zero Suicide Visionary Award will be presented in his honor. Below is information on the award and instructions for nominating someone. We look forward to seeing everyone in Liverpool and remembering Jan’s contributions to making sure no one dies alone and in despair.

Dr. Jan Mokkenstorm played an integral part of the inaugural International Zero Suicide Summit with the International Initiative for Mental Health Leadership match in Oxford in 2014. In subsequent years, Dr. Mokkenstorm attended the International Zero Suicide Summits in Atlanta (2015), and Sydney (2017) in his continued commitment to the global Zero Suicide Movement. He provided vital participation in the collaborative development of the “International Declaration for Better Healthcare: Zero Suicide” in 2015. He also continued the push for the initiative to “move beyond the tipping point” by hosting the 4th international Zero Suicide Summit in Rotterdam in 2018.

Jan demonstrated his passionate commitment to reducing suicides through his tireless efforts to promote the belief that suicides should never be an event that occurs. Through visionary leadership he inspired countless others to join this cause themselves on an individual, organizational, and community level. He was instrumental in spreading the global adoption of the Zero Suicide mission as well as set the pace for innovation and substantial change in many countries across the globe. Simply put, Jan demonstrated exceptional service to the betterment of society through his work with Zero Suicide and suicide prevention.

Nomination Requirements
1. Must have shown national/international leadership in the area of suicide prevention
2. Must have participated in fostering substantial change and innovation in the area of suicide prevention
3. Must have challenged/helped shape government policies and supported a wider awareness and discussion around suicide prevention
4. Must be in attendance at the International Zero Suicide Summit when the award will be presented
5. Must have two (2) letters of recommendation from recognized suicide prevention leaders in one’s home country

Judging
1. The announcement of nominations will be handled by the host nation in conjunction with other communications about the Zero Suicide Summit
2. The host nation will convene a Nomination Committee of three individuals who will review the nominations and award one winner

If you have nominations or would like to participate, please contact Becky Stoll, Vice President, Crisis and Disaster Management at becky.stoll@centerstone.org.
The National Center of Excellence for Eating Disorders (NCEED) was created to serve as the centralized hub dedicated to eating disorders education and training for both healthcare providers and the general public. NCEED is partnering with the 3C Institute to develop and launch an interactive, web-based, educational, training platform to ensure that high-quality trainings are provided to health professionals across multiple disciplines.

Visit NCEED’s Website at https://www.nceedus.org/

NCEED is the nation’s first center of excellence dedicated to eating disorders. It was founded in 2018 by the Substance Abuse and Mental Health Services Administration (SAMHSA), with the mission to advance education and training of healthcare providers and to promote public awareness of eating disorders and eating disorder treatment. Based at the University of North Carolina at Chapel Hill, NCEED includes clinicians, researchers, and advocates who specialize in eating disorders care and are committed to providing up-to-date, reliable, and evidence-based information.

The goal of NCEED is to ensure that all individuals with eating disorders are identified, treated, and supported in recovery. Though eating disorders are serious conditions, they can be identified and treated effectively—particularly when providers and the public have the knowledge and skills necessary to make a difference.

Information, Training, and Technical Assistance

The NCEED website (https://www.nceedus.org/) is designed to be user-friendly and easy to navigate for all users. The center’s web platform is divided into four content areas based on the user’s role. These content areas tailor the user’s experience in searching for up-to-date, evidence-based trainings and resources.

Get information on mental health services and resources near you, searchable by state or zip code: www.samhsa.gov/find-help

Behavioral Health Treatment Services Locator
NCAPPS assists states, tribes, and territories to transform their long-term care service and support systems to implement U.S. Department of Health and Human Services policy on person-centered thinking, planning, and practices. It supports a range of person-centered thinking, planning, and practices, regardless of funding source. Activities include providing technical assistance to states, tribes, and territories; establishing communities of practice to promote best practices; hosting educational webinars; and creating a national clearinghouse of resources to support person-centered practice. Visit the new NCAPPS website for more information.

Each month, NCAPPS will host monthly informational webinars on a range of topics that relate to person-centered thinking, planning, and practice. NCAPPS webinars are open to the public, and are geared toward human services administrators, providers, and people who use long-term services and supports. Webinars will be recorded and archived on the NCAPPS website. All webinars will include a panelist who represents the perspective of service users, including our Person-Centered Advisory and Leadership Group members, self-advocates, or other stakeholders with lived experience with the topic.

| May 2020 | Person-Centered Thinking, Planning, and Practice in the No Wrong Door System (e.g., Aging and Disability Resource Centers, Centers for Independent Living, and Area Agencies on Aging) |
| June 15, 1:00 p.m. to 2:30 p.m. E.T. | Meaningful Stakeholder Engagement: A Collaborative Approach to Programs for People with Intellectual and Development Disabilities and Their Families REGISTER HERE |
| July 2020 | Applying Person-Centered Thinking, Planning, and Practice in Long-Term Care Settings |
| August 2020 | Myths and Misperceptions about Financing Peer Support in Medicaid |
| September 2020 | Electronic Health Records in Person-Centered Care Planning: Pitfalls and Promises |
| October 2020 | Best Practice in Incorporating Supported Decision-Making and Person-Centered Thinking, Planning, and Practice |
| November 2020 | Person, Family, Clan, Community: Understanding Person-Centered Thinking, Planning, and Practice in Tribal Nations |
| December 2020 | Toward Person-Centered Transitions: Applying Person-Centered Thinking, Planning, and Practice for Youth with Disabilities in Transition |

The 2020 Patient Advocacy Summit part of the 8th Annual Patient Congress April 6-7 in Philadelphia is just one month away. The conference's topic is "Foster an Integrated Approach to Patient Advocacy through Patient Engagement, Public Policy Education, and Stakeholder Collaboration." This Summit will bring together pharmaceutical manufacturers, patient groups, patient leaders, and policy makers, to discuss ways to tackle the complexities of patient advocacy and the health care market.

Key Themes to be Addressed:

- Patient Advocacy Strategies
- Policy Initiatives and Legislation
- Value Metrics and Measurable Outcomes
- Patient Education and Support Initiatives
- Compliance and Transparency in Advocacy Partnerships
- Social Media and Patient Engagement

Knowledge Informing Transformation
National Guidelines for Behavioral Health Crisis Care – A Best Practice Toolkit

GET THE TOOLKIT HERE
SAMHSA’s Early Serious Mental Illness Treatment Locator is a confidential and anonymous source of information for persons and their family members who are seeking treatment facilities in the United States or U.S. Territories for a recent onset of serious mental illnesses such as psychosis, schizophrenia, bi-polar disorder, or other conditions. These evidence-based programs provide medication therapy, family and peer support, assistance with education and employment and other services.

Individuals who experience a first onset of serious mental illness - which can include a first episode of psychosis - may experience symptoms that include problems in perception (such as seeing, hearing, smelling, tasting or feeling something that is not real), thinking (such as believing in something that is not real even when presented with facts), mood, and social functioning. There are effective treatments available and the earlier that an individual receives treatment, the greater likelihood that these treatments can lead to better outcomes and enable people to live full and productive lives with their family and friends.

SAMHSA has integrated data on first episode psychosis programs that was provided by NASMHPD and the NASMHPD Research Institute (NRI) into its existing treatment locator. Users receive information on Coordinated Specialty Care and other first episode psychosis programs operating in their state. This tool is designed to help quickly connect individuals with effective care in order to reduce the risk of disability.
